# Yorke Peninsula Council area

## About the profile areas

### Location and boundaries

The Yorke Peninsula Council area is located in the Yorke and Mid North Region of South Australia, between 150 and 300 kilometres north-west and west of the Adelaide CBD. The Yorke Peninsula Council area is bounded by the Copper Coast Council area and the Barunga West Council area in the north, the Wakefield Regional Council area in the north-east, Gulf St Vincent in the east and south, and Spencer Gulf in the west.

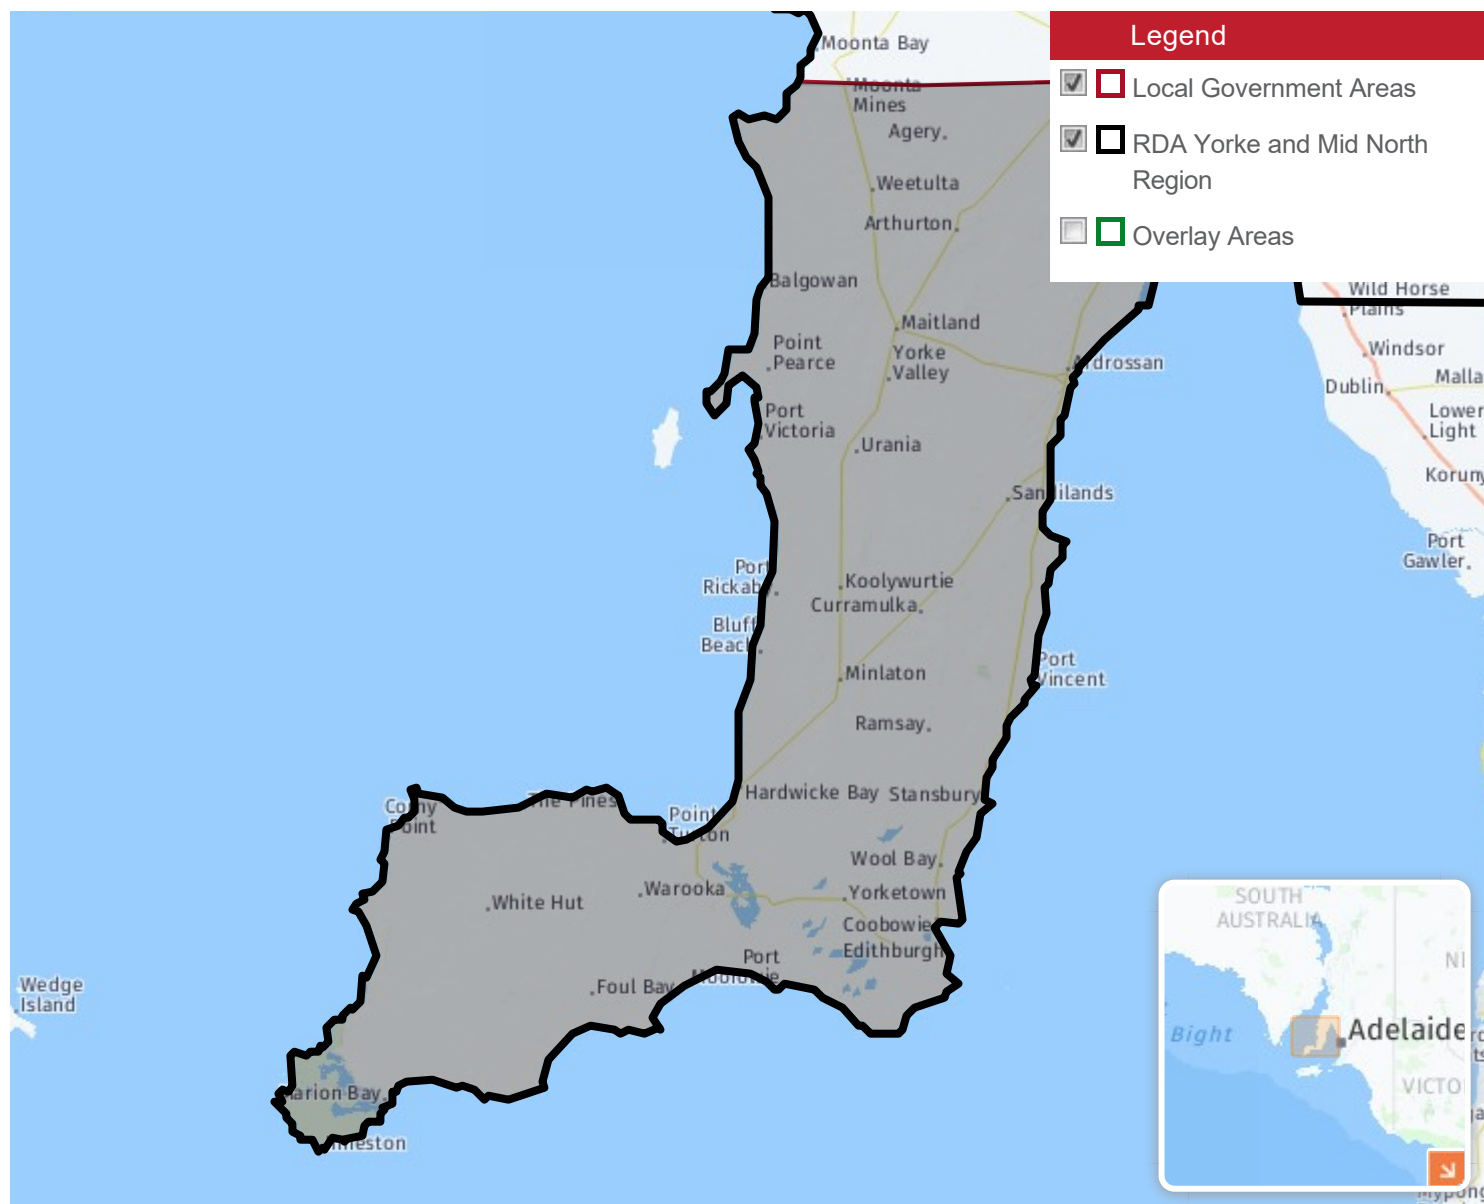

### Name origin

The Yorke Peninsula Council is named after the Yorke Peninsula, which was named by Captain Matthew Flinders after the Right Honourable Charles Philip Yorke.

# Profile areas

Yorke Peninsula Council area

Compiled and presented in profile.id by .id, the population experts.

## Settlement history

European settlement of the area dates from the 1840s, with land used mainly for sheep grazing and grain growing. Growth took place during the late 1800s, spurred by the establishment of mining, sand quarrying and salt production, and the transport of grain and minerals via several ports, including Ardrossan Port. Numerous small townships were established from the 1870s. A large dolomite mine was established by BHP near Ardrossan in 1950. A deep water port was constructed at Port Giles (Coobowie) in 1970, becoming the main port for exporting grain and seeds. The population has been relatively stable in recent decades.

## Land use

The Yorke Peninsula Council area is predominantly rural, with the main township being Ardrossan, small townships at Edithburgh, Maitland, Minlaton, Port Victoria, Port Vincent, Stansbury, Warooka and Yorketown, and numerous small villages and holiday settlements. Rural land is used largely for agriculture (particularly grain growing and sheep and cattle grazing), with salt production, mining, fishing and tourism also being important industries. The Council area encompasses a total land area of nearly 6,000 square kilometres.

## Transport

The Yorke Peninsula Council area is served by the Spencer Highway, the St Vincent Highway, the Yorke Highway, the Port of Ardrossan, Klein Point Port and Port Giles.

## Major features

Major features of the Council area include Innes National Park, various Conservation Parks (Carribie, Clinton, Leven Beach, Minlacowie, Point Davenport, Ramsay, Warrenben and Wills Creek), numerous beaches, TAFE SA (Narungga Campus), Edithburgh Tidal Pool, numerous salt lakes, Edithburgh Native Flora Reserve, Minlaton Fauna Park, Daly Head National Surfing Reserve, Ballywire Farm, Alpacas Chaparral, Barachel Alpacas, Barley Stacks Wines, Ardrossan Historical Museum, Bublacowie Military Museum, Edithburgh Museum, Maitland Museum, Minlaton Museum, Port Victoria Maritime Museum, Stansbury Museum, Warooka Museum, various golf clubs, Wattle Point Wind Farm, Ardrossan Dolomite Mine, Ardrossan Community Hospital, Southern Yorke Peninsula Health Service (Yorketown Hospital), Maitland Hospital, Minlaton Hospital and various jetties.

## Indigenous background

The original inhabitants of the Yorke Peninsula Council area were the Nharangga Aboriginal people.

## Included areas

The Yorke Peninsula Council area includes the localities of Agery, Ardrossan, Arthurton, Balgowan, Black Point, Bluff Beach, Brentwood, Chinaman Wells, Clinton, Clinton Centre, Coobowie, Corny Point, Couch Beach, Cunningham, Curramulka, Dowlingville, Edithburgh, Foul Bay, Hardwicke Bay, Honiton, Inneston, James Well, Kainton, Koolywurtie, Maitland, Marion Bay, Minlaton, Nalyappa, Parsons Beach, Petersville, Pine Point, Point Pearce, Point Souttar, Point Turton, Port Arthur, Port Julia, Port Moorowie, Port Rickaby, Port Victoria, Port Vincent, Price, Ramsay, Rogues Point, Sandilands, Sheaoak Flat, South Kilkerran, Stansbury, Sultana Point, Sunnyvale, The Pines, Tiddy Widdy Beach, Urania, Warooka, Wauraltee, Weetulta, White Hut, Winulta, Wool Bay, Yorke Valley and Yorketown.

# Yorke Peninsula Council area

## Population and dwellings

There are a number of different ways of measuring the population of an area, all of which give an insight into the size of the place and its rate of growth over different time periods. The Census counts people where they are on the night of the Census (enumerated population) and also by where they usually live (usual residence). Both these populations are useful and form the basis for a range of characteristics collected in the Census.

However, the most accurate count of the total population is Estimated Resident Population, which factors in an estimate of those missed in the Census and those who were overseas on Census night. It is usually higher than either Census count, and is also updated annually after the Census, providing preliminary estimates for up to 5 years.

This page provides the three population counts for Yorke Peninsula Council area at the last Census, with comparisons to previous Census years for the Census counts only. The current estimate for Yorke Peninsula Council area at the most recent year available is shown at the top of the page. This figure is a preliminary estimate only and is subject to review after the next Census data are released. Please use with caution.

Also included are a range of sub-population groups and key statistics from the Census (usual resident) population, such as citizens, employed persons and Indigenous population.

These figures all provide the context for the size of the population and growth rate within Yorke Peninsula Council area and should be looked at in conjunction with other basic demographic information, such as Age Structure, Dwelling Type and Household Size.

The data on this page are sourced from a variety of different tables and designed to give a range of population and dwelling numbers for the area.

## Population

\*Note that this is an estimate based on ERP at the SA1 level. It is subject to review after the next Census data release and may not match .id's population forecasts.

# Yorke Peninsula Council area

## Estimated Resident Population (ERP)

The Estimated Resident Population is the OFFICIAL RDA Yorke and Mid North Region population for 2018. For areas within Yorke Peninsula Council area, the ERP is not an official count but an experimental estimate which is subject to review after the next Census.

Populations are counted and estimated in various ways. The most comprehensive population count available in Australia is derived from the Census of Population and Housing conducted by the Australian Bureau of Statistics every five years. However the Census count is generally an under-estimate of the actual population, due to people missed in the Census and people overseas on Census night. To provide a more accurate population figure which is updated more frequently than every five years, the Australian Bureau of Statistics also produces "Estimated Resident Population" (ERP) numbers for Yorke Peninsula Council area. Estimates for areas within Yorke Peninsula Council area are based on aggregates of SA1s derived from population distributions applicable at the 2011 Census. Actual populations may vary slightly where population growth has not been uniform since the previous Census.

See [data notes](#) for a detailed explanation of different population types, how they are calculated and when to use each one.

## Estimated Resident Population (ERP)

Yorke Peninsula Council area			
Year (ending June 30)	Number	Change in number	Change in percent
2006	11,474	--	--
2007	11,409	-65	-0.57

# Yorke Peninsula Council area

## Service age groups

The Age Structure of Yorke Peninsula Council area provides key insights into the level of demand for age based services and facilities such as child care. It is an indicator of Yorke Peninsula Council area's residential role and function and how it is likely to change in the future.

Service age groups divide the population into age categories that reflect typical life-stages. They indicate the level of demand for services that target people at different stages in life and how that demand is changing.

To get a more complete picture Yorke Peninsula Council area's Age Structure should be viewed in conjunction with Household Types and Dwelling Types.

## Age structure - Service age groups

Yorke Peninsula Council area - Total persons (Usual residence)	2016			2011			Change

## Dominant groups

---

Analysis of the service age groups of Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a lower proportion of people in the younger age groups (0 to 17 years) and a higher proportion of people in the older age groups (60+ years).

Overall, 16.7% of the population was aged between 0 and 17, and 42.3% were aged 60 years and over, compared with 21.3% and 29.2% respectively for Regional SA.

The major differences between the age structure of Yorke Peninsula Council area and Regional SA were:

- A *larger* percentage of 'Seniors' (18.0% compared to 12.1%)
- A *larger* percentage of 'Empty nesters and retirees' (20.1% compared to 14.4%)
- A *smaller* percentage of 'Parents and homebuilders' (13.7% compared to 17.8%)
- A *smaller* percentage of 'Young workforce' (7.2% compared to 10.4%)

## Emerging groups

---

From 2011 to 2016, Yorke Peninsula Council area's population increased by 37 people (0.3%). This represents an average annual population change of 0.07% per year over the period.

The largest changes in the age structure in this area between 2011 and 2016 were in the age groups:

- Seniors (70 to 84) (+218 people)
- Parents and homebuilders (35 to 49) (-208 people)
- Empty nesters and retirees (60 to 69) (+187 people)
- Secondary schoolers (12 to 17) (-115 people)

# Yorke Peninsula Council area

## Five year age groups

The Age Structure of Yorke Peninsula Council area provides key insights into the level of demand for age based services and facilities such as child care. It is also an indicator of Yorke Peninsula Council area's residential role and function and how it is likely to change in the future.

Five year age groups present a classic age profile of the population. Each age group covers exactly five years, which enables direct comparison between each group.

To get a more complete picture Yorke Peninsula Council area's Age Structure should be viewed in conjunction with Household Types and Dwelling Types.

## Age structure - Five year age groups

## Dominant groups

---

Analysis of the five year age groups of Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a lower proportion of people in the younger age groups (under 15) and a higher proportion of people in the older age groups (65+).

Overall, 13.8% of the population was aged between 0 and 15, and 32.5% were aged 65 years and over, compared with 17.7% and 21.9% respectively for Regional SA.

The major differences between the age structure of Yorke Peninsula Council area and Regional SA were:

- A *larger* percentage of persons aged 65 to 69 (10.3% compared to 7.1%)
- A *larger* percentage of persons aged 70 to 74 (8.5% compared to 5.5%)
- A *larger* percentage of persons aged 60 to 64 (9.8% compared to 7.3%)
- A *smaller* percentage of persons aged 20 to 24 (2.8% compared to 4.8%)

## Emerging groups

---

From 2011 to 2016, Yorke Peninsula Council area's population increased by 33 people (0.3%). This represents an average annual population change of 0.06% per year over the period.

The largest changes in age structure in this area between 2011 and 2016 were in the age groups:

- 70 to 74 (+190 persons)
- 65 to 69 (+183 persons)
- 40 to 44 (-134 persons)
- 85 and over (+110 persons)

# Yorke Peninsula Council area

## Ancestry

Ancestry defines the cultural association and ethnic background of an individual going back three generations. Ancestry is a good measure of the total size of cultural groups in Yorke Peninsula Council area regardless of where they were born or what language they speak.

Ancestry data, should be combined with data on Birthplace, Language Spoken at Home and Religion for a more complete picture of Yorke Peninsula Council area's ethnic characteristics.

Please note that the "Australian Aboriginal" and "Torres Strait Islander" categories in this topic are not considered to be a reliable estimate of the indigenous peoples of Australia. For information on this group, please use the "Aboriginal and Torres Strait Islander Population" found on the [Population](#) page.

*Please note: Due to changes in ABS rules around perturbation and additivity of data to protect the confidentiality of individuals in 2016, counts of ancestry groups and totals derived from them may differ slightly from those published by the ABS. For more information see notes on data confidentiality.*

## Dominant groups

Analysis of the ancestry responses of the population in Yorke Peninsula Council area in 2016 shows that the top five ancestries nominated were:

- English (5,056 people or 45.7%)
- Australian (4,830 people or 43.7%)
- German (1,126 people or 10.2%)
- Scottish (1,011 people or 9.1%)
- Irish (929 people or 8.4%)

In combination these five ancestries account for 12,952 responses in total, or 117.13% of all responses.

The major differences between the ancestries of the population in Yorke Peninsula Council area and Regional SA were:

- A *larger* percentage of people with English ancestry (45.7% compared to 41.1%)
- A *larger* percentage of people with Australian ancestry (43.7% compared to 42.1%)
- A *smaller* percentage of people with Italian ancestry (1.0% compared to 2.1%)

## Emerging groups

The largest changes in the reported ancestries of the population in this area between 2011 and 2016 were:

- English (+138 persons)
- Irish (+109 persons)
- Scottish (+69 persons)
- Australian (-50 persons)

# Yorke Peninsula Council area

## Birthplace

Country of Birth data identifies where people were born and is indicative of the level of cultural diversity in Yorke Peninsula Council area. The mix of Country of Birth groups is also indicative of historical settlement patterns, as source countries for Australia's immigration program have varied significantly over time.

To get a more complete picture of cultural and ethnic characteristics, Yorke Peninsula Council area's Country of Birth data should be viewed together with **Ancestry**, **Language Spoken at Home** and **Religion**.

*Please note: Due to changes in ABS rules around perturbation and additivity of data to protect the confidentiality of individuals in 2016, counts of individual birthplace groups and totals derived from them may differ slightly from those published by the ABS. For more information see notes on data confidentiality.*

## Dominant groups

Analysis of the country of birth of the population in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a smaller proportion of people born overseas.

Overall, 9.3% of the population was born overseas, compared with 11.2% for Regional SA.

*There were no major differences between Yorke Peninsula Council area and Regional SA in 2016.*

## Emerging groups

Between 2011 and 2016, the number of people born overseas increased by 25 or 2.5%.

*There were no major differences in Yorke Peninsula Council area between 2011 and 2016.*

# Yorke Peninsula Council area

## Overseas arrivals

The Year of Arrival data records when the overseas born population arrived in Australia. The data shows the degree to which areas are 'ports' for new overseas arrivals and reveals the role of Yorke Peninsula Council area in housing the overseas-born. The number of recent overseas arrivals in an area is often determined by housing affordability, employment opportunities and pre-existing communities located in the area.

Yorke Peninsula Council area's Year of Arrival data, when used with Birthplace, Religion and Language Spoken at Home data, is a good indicator of the likely need for services in migrant communities.

## Overseas arrivals

Yorke Peninsula Council area - Overseas born (Usual residence)	2016		
Year of arrival in Australia	Number	%	Regional SA %
2011 to 9 Aug 2016	40	3.9	12.4

## Dominant groups

---

Analysis of the year of arrival for the overseas born population of Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a larger proportion of people who arrived before 2001, and a smaller proportion of recent overseas arrivals (those who arrived between 2011 to 9 Aug 2016).

Overall, 84.6% of the overseas born population arrived before 2001, and 4% arrived during or after 2011, compared with 68.5% and 12.4% respectively for Regional SA.

The major differences in year of arrival data in the population between Yorke Peninsula Council area and Regional SA are:

- A *larger* percentage of arrivals between 1961 and 1970 (36.6% compared to 26.5%)
- A *larger* percentage of arrivals between in 1960 or earlier (24.9% compared to 17.3%)
- A *smaller* percentage of arrivals between 2011 to 9 Aug 2016 (3.9% compared to 12.4%)
- A *smaller* percentage of arrivals between 2006 and 9 Aug 2011 (4.0% compared to 9.9%)

# Yorke Peninsula Council area

## Proficiency in English

Proficiency in English measures the self-assessed proficiency in spoken English of people who speak a language other than English at home. The data, when viewed with other ethnic and cultural indicators, such as **Ancestry**, **Country of Birth**, **Language Spoken at Home** and **Religion**, reflects Yorke Peninsula Council area's ethnic composition and how long the overseas born have been in Australia. This helps service providers determine whether they need to communicate with the local population in languages other than English.

## Proficiency in English

Yorke Peninsula Council area - Total persons (Usual residence)	2016			2011			Change
English proficiency	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016
Speaks English only	10,277	93.0	87.9	10,569	95.9	90.9	-292
Speaks another language, and English well or very well	186	1.7	4.3	190	1.7	4.1	-4
Speaks another language, and English not well or not at all	11	0.1	0.8	17	0.2	0.8	-6

## Dominant groups

Analysis of the proficiency in English data of the population in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a higher proportion of people who spoke English only, and a lower proportion of people who spoke another language and English not well or not at all.

Overall, 93.0% of people spoke English only, and 0.1% spoke another language and English not well or not at all, compared with 87.9% and 0.8% respectively for Regional SA.

## Emerging groups

---

The most significant change in the proficiency in English of the population in this area between 2011 and 2016 was in those speaking:

- Speaks English only (-292 persons)

# Yorke Peninsula Council area

## Language spoken at home

Yorke Peninsula Council area's language statistics show the proportion of the population who speak a language at home other than English. They indicate how culturally diverse a population is and the degree to which different ethnic groups and nationalities are retaining their language.

Yorke Peninsula Council area's language statistics should be analysed in conjunction with **Country of Birth** and **Proficiency in English** to assist in identifying specific cultural and ethnic groups in the area and the services required by the multicultural community.

*Please note: Due to changes in ABS rules around perturbation and additivity of data to protect the confidentiality of individuals in 2016, counts of individual language groups and totals derived from them may differ slightly from those published by the ABS. For more information see notes on data confidentiality.*

## Language spoken at home - Ranked by size

## Dominant groups

---

Analysis of the language spoken at home by the population of Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a larger proportion of people who spoke English only, and a smaller proportion of those speaking a non-English language (either exclusively, or in addition to English).

Overall, 92.9% of the population spoke English only, and 1.5% spoke a non-English language, compared with 87.9% and 4.9% respectively for Regional SA.

The dominant language spoken at home, other than English, in Yorke Peninsula Council area was Filipino/Tagalog, with 0.2% of the population, or 17 people speaking this language at home.

*There were no major differences between Yorke Peninsula Council area and Regional SA in 2016.*

## Emerging groups

---

Between 2011 and 2016, the number of people who spoke a language other than English at home increased by 12 or 7.6%, and the number of people who spoke English only decreased by 294 or 2.8%.

*There were no major differences in Yorke Peninsula Council area between 2011 and 2016.*

# Yorke Peninsula Council area

## Religion

Yorke Peninsula Council area's religion statistics provide an indicator of cultural identity and ethnicity when observed in conjunction with other key variables. Religion data reveal the major concentrations of religions as well as revealing the proportion of people with no religious affiliation. There are a number of reasons for different religious compositions across areas including the country of birth and ethnic background of the population, the age of the population (belief in religion is generally stronger, the older the population) and changes in values and belief systems.

Yorke Peninsula Council area's religion statistics should be analysed in conjunction with other ethnicity statistics such as Country of Birth data and Language Spoken data to assist in identifying specific cultural and ethnic groups.

*Please note: Due to changes in ABS rules around perturbation and additivity of data to protect the confidentiality of individuals in 2016, counts of individual religion groups and totals derived from them may differ slightly from those published by the ABS. For more information see notes on data confidentiality.*

## Dominant groups

---

Analysis of the highest level of schooling attained by the population in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a higher proportion of people who had left school at an early level (Year 10 or less) and a lower proportion of people who completed Year 12 or equivalent.

Overall, 40.2% of the population left school at Year 10 or below, and 29.5% went on to complete Year 12 or equivalent, compared with 35.1% and 33.4% respectively for Regional SA.

The major differences between the level of schooling attained by the population in Yorke Peninsula Council area and Regional SA were:

- A *larger* percentage of persons who completed year 10 or equivalent (22.4% compared to 20.2%)
- A *larger* percentage of persons who completed year 9 or equivalent (8.9% compared to 7.2%)
- A *larger* percentage of persons who completed year 8 or below (8.7% compared to 7.2%)
- A *smaller* percentage of persons who completed year 12 or equivalent (29.5% compared to 33.4%)

## Emerging groups

---

The largest changes in the level of schooling attained by the population in Yorke Peninsula Council area, between 2011 and 2016 were:

- Year 12 or equivalent (+382 persons)
- Year 8 or below (-261 persons)
- Year 10 or equivalent (-80 persons)

# Yorke Peninsula Council area

## Education institution attending

The share of Yorke Peninsula Council area's population attending educational institutions reflects the age structure of the population, as it is influenced by the number of children attending school; proximity to tertiary education, which can mean young adults leaving home to be nearer to educational facilities and; the degree to which people are seeking out educational opportunities in adulthood, especially in their late teens and early twenties.

This data is often combined with **Age Structure** to identify areas with significant university student populations.

Learn more about planning education provision [here](#).

## Education institution attending

## Dominant groups

---

Analysis of the share of the population attending educational institutions in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a lower proportion attending primary school, a lower proportion attending secondary school, and a lower proportion engaged in tertiary level education.

Overall, 7.2% of the population were attending primary school, 4.4% of the population were attending secondary institutions, and 1.4% were learning at a tertiary level, compared with 8.7%, 5.4% and 2.8% respectively for Regional SA.

The major differences between the share of the population attending learning institutions in Yorke Peninsula Council area and Regional SA were:

- A *larger* percentage of persons not attending (78.9% compared to 73.1%)
- A *smaller* percentage of persons attending a Government primary school (7.2% compared to 8.7%)
- A *smaller* percentage of persons attending a Catholic primary school (5.1% compared to 6.4%)
- A *smaller* percentage of persons attending a Government secondary school (4.4% compared to 5.4%)

## Emerging groups

---

From 2011 to 2016, Yorke Peninsula Council area's population increased by 32 people (+0.3%). This represents an average annual change of 0.06% per year over the period.

The largest changes in the number of persons attending education institutions in Yorke Peninsula Council area, between 2011 and 2016 were in those who nominated:

- Primary - Government (-128 persons)
- Primary school (-93 persons)
- Secondary school (-71 persons)
- Secondary - Government (-60 persons)

# Yorke Peninsula Council area

## Need for assistance

Yorke Peninsula Council area's disability statistics relate directly to need for assistance due to a severe or profound disability. The information may be used in the planning of local facilities, services such as day-care and occasional care and in the provision of information and support to carers. Yorke Peninsula Council area's disability statistics help in understanding the prevalence of people who need support in the community, and along with information on **Unpaid Care** to a person with a disability, how that support is provided.

*Please note: A person's reported need for assistance is based on a subjective assessment and should therefore be treated with caution. See the **specific data notes** for further detail.*

*Due to changes in ABS rules concerning perturbation and additivity of data to protect the confidentiality of individuals in 2016, counts of individual age groups with a need for assistance in 2016 may not add up to the table total. The table total is independently calculated and will be closer to the true population requiring assistance. Due to ABS adjustments of small numbers, no reliability can be placed on small data cells in 2016. For more information please see the data notes on Data Confidentiality.*

## Dominant groups

Analysis of the need for assistance of people in Yorke Peninsula Council area compared to Regional SA shows that there was a higher proportion of people who reported needing assistance with core activities.

Overall, 8.0771% of the population reported needing assistance with core activities, compared with 6.2296% for Regional SA.

The major differences in the age groups reporting a need for assistance in Yorke Peninsula Council area and Regional SA were:

- A *larger* percentage of persons aged 85 and over (45.9% compared to 41.7%)
- A *larger* percentage of persons aged 65 to 69 (10.0% compared to 8.0%)
- A *smaller* percentage of persons aged 75 to 79 (10.9% compared to 13.0%)
- A *smaller* percentage of persons aged 80 to 84 (19.4% compared to 21.4%)

## Emerging groups

*There were no major differences in Yorke Peninsula Council area between 2011 and 2016.*

# Yorke Peninsula Council area

## Employment status

Yorke Peninsula Council area's employment statistics are an important indicator of socio-economic status. The levels of full or part-time employment, unemployment and labour force participation indicate the strength of the local economy and social characteristics of the population. Employment status is linked to a number of factors including **Age Structure**, which influences the number of people in the workforce; the economic base and employment opportunities available in the area and; the education and skill base of the population (**Occupations, Industries, Qualifications**).

## Employment status

Yorke Peninsula Council area - Persons (Usual residence)	2016			2011			Change

## Dominant groups

The size of Yorke Peninsula Council area's labour force in 2016 was 4,311, of which 1,750 were employed part-time and 2,219 were full time workers.

Analysis of the employment status (as a percentage of the labour force) in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a higher proportion in employment, and a lower proportion unemployed. Overall, 94.3% of the labour force was employed (0.0% of the population aged 15+), and 5.7% unemployed (0.0% of the population aged 15+), compared with 93.4% and 6.6% respectively for Regional SA.

The labour force participation rate refers to the proportion of the population aged 15 years and over that was employed or actively looking for work. *"The labour force is a fundamental input to domestic production. Its size and composition are therefore crucial factors in economic growth. From the viewpoint of social development, earnings from paid work are a major influence on levels of economic well-being."* (Australian Social Trends 1995).

Analysis of the labour force participation rate of the population in Yorke Peninsula Council area in 2016 shows that there was a lower proportion in the labour force (45.2%) compared with Regional SA (54.4%).

## Emerging groups

---

Between 2011 and 2016, the number of people employed in Yorke Peninsula Council area showed a decrease of 138, and the number unemployed showed an increase of 53. In the same period, the number of people in the labour force showed a decrease of 85 or 1.9%.

# Yorke Peninsula Council area

## Industry sector of employment

Yorke Peninsula Council area's industry statistics identify the industry sectors in which the residents work (which may be within the residing area or elsewhere). This will be influenced by the skill base and socio-economic status of the residents as well as the industries and employment opportunities present in the region.

When viewed in conjunction with **Residents Place of Work** data and **Method of Travel to Work**, industry sector statistics provide insights into the relationship between the economic and residential role of the area.

## Dominant groups

---

An analysis of the jobs held by the resident population in Yorke Peninsula Council area in 2016 shows the three most popular industry sectors were:

- Agriculture, Forestry and Fishing (1,078 people or 26.6%)
- Health Care and Social Assistance (462 people or 11.4%)
- Retail Trade (377 people or 9.3%)

In combination, these three industries employed 1,917 people in total or 47.2% of the total employed resident population.

In comparison, Regional SA employed 14.6% in Agriculture, Forestry and Fishing; 12.1% in Health Care and Social Assistance; and 10.4% in Retail Trade.

**The major differences between the jobs held by the population of Yorke Peninsula Council area and Regional SA were:**

- A *larger* percentage of persons employed in agriculture, forestry and fishing (26.6% compared to 14.6%)
- A *smaller* percentage of persons employed in manufacturing (4.4% compared to 9.4%)
- A *smaller* percentage of persons employed in retail trade (9.3% compared to 10.4%)

## Emerging groups

---

The number of employed people in Yorke Peninsula Council area decreased by 150 between 2011 and 2016.

**The largest changes in the jobs held by the resident population between 2011 and 2016 in Yorke Peninsula Council area were for those employed in:**

- Construction (-57 persons)
- Retail Trade (-55 persons)

# Yorke Peninsula Council area

## Occupation of employment

Yorke Peninsula Council area's occupation statistics quantify the occupations in which the residents work (which may be within the residing area or elsewhere). This will be influenced by the economic base and employment opportunities available in the area, education levels, and the working and social aspirations of the population. When viewed with other indicators, such as **Educational Qualifications** and **Individual Income**, Occupation is a key measure for evaluating Yorke Peninsula Council area's socio-economic status and skill base.

## Occupation of employment

## Dominant groups

---

An analysis of the jobs held by the resident population in Yorke Peninsula Council area in 2016 shows the three most popular occupations were:

- Managers (1,090 people or 26.7%)
- Labourers (584 people or 14.3%)
- Technicians and Trades Workers (535 people or 13.1%)

In combination these three occupations accounted for 2,209 people in total or 54.2% of the employed resident population.

In comparison, Regional SA employed 16.9% in Managers; 15.7% in Labourers; and 14.2% in Technicians and Trades Workers.

The major differences between the jobs held by the population of Yorke Peninsula Council area and Regional SA were:

- A *larger* percentage of persons employed as Managers (26.7% compared to 16.9%)
- A *smaller* percentage of persons employed as Professionals (10.3% compared to 12.7%)
- A *smaller* percentage of persons employed as Sales Workers (7.3% compared to 9.0%)
- A *smaller* percentage of persons employed as Labourers (14.3% compared to 15.7%)

## Emerging groups

---

The number of employed people in Yorke Peninsula Council area decreased by 135 between 2011 and 2016.

The largest change in the occupations of residents between 2011 and 2016 in Yorke Peninsula Council area was for those employed as:

- Managers (-58 persons)

# Yorke Peninsula Council area

## Method of travel to work

Yorke Peninsula Council area's commuting statistics reveal the main modes of transport by which residents get to work. There are a number of reasons why people use different modes of transport to get to work including the availability of affordable and effective public transport options, the number of motor vehicles available within a household, and the distance travelled to work.

Commuting data is very useful in transport planning as it informs decision-makers about the availability, effectiveness and utilisation of local transport options, particularly when analysed with Residents Place of Work data and Car Ownership.

## Dominant groups

---

In 2016, there were 17 people who caught public transport to work (train, bus, tram or ferry) in Yorke Peninsula Council area, compared with 2,396 who drove in private vehicles (car – as driver, car – as passenger, motorbike, or truck).

Analysis of the method of travel to work of the residents in Yorke Peninsula Council area in 2016, compared to Regional SA, shows that 0.4% used public transport, while 59.0% used a private vehicle, compared with 1.0% and 71.9% respectively in Regional SA.

**The major differences in persons between the method of travel to work of Yorke Peninsula Council area and Regional SA were:**

- A *larger* percentage of persons who worked at home (13.6% compared to 7.3%)
- A *larger* percentage of persons who walked only (10.1% compared to 4.9%)
- A *smaller* percentage of persons who travelled by car (as driver) (55.4% compared to 66.0%)
- A *smaller* percentage of persons who travelled by car (as a passenger) (2.6% compared to 4.6%)

## Emerging groups

---

The number of employed people in Yorke Peninsula Council area decreased by 141 between 2011 and 2016.

**The largest changes in the method of travel to work by resident population in Yorke Peninsula Council area between 2011 and 2016 were for those nominated:**

- Did not go to work (+74 persons)
- Worked at home (-57 persons)

# Yorke Peninsula Council area

## Disengagement by age

Engagement in employment and education looks at the level of participation by age and sex of the population in the labour market, or full or part-time education. A full time employed or full-time student would be "Fully engaged", while part-time students may be fully engaged if they are also employed, or partly engaged if they are not working. Engagement in the labour and education market is highly dependent on age. Retirees are generally disengaged, while stay-at-home parents are also likely to be disengaged. The rate of engagement, particularly in the younger and working age groups can be affected by access to strong employment and education markets and is a measure of socio-economic status and the level of welfare dependency in an area. For more detail on employment and educational characteristics associated with disengagement, please look at [Employment Status](#), [Qualifications](#) and [Educational Institution Attending](#).

## Workforce and educational engagement by age

The number of people aged 15 to 24 years in Yorke Peninsula Council area in 2016 was 775, of this, 10.6% were disengaged and 14.6% were partially engaged, compared to 13.0% and 16.5% respectively for Regional SA.

## Dominant groups

---

Between 2011 and 2016, the number of people 15 to 24 years in Yorke Peninsula Council area showed a decrease of -108.

The number of disengaged people aged 15 to 24 years showed a decrease of 32 or 28.1%.

# Yorke Peninsula Council area

## Volunteer work

The voluntary work sector is an important part of Australia's economy. The level of volunteering can indicate the cohesiveness of the community and how readily individuals are able to contribute to that community. Factors impacting on the level of volunteering in Yorke Peninsula Council area include the Age Structure of the population, the level of Proficiency in English, Income and Education levels.

## Volunteer work

Yorke Peninsula Council area - Persons aged 15+ (Usual residence)	2016			2011			Change
Volunteer status	Number	%	Regional SA %	Number	%	Regional SA %	2011 to 2016
Volunteer	3,262	34.2	27.8	3,094	33.2	26.8	+168

## Dominant groups

Analysis of the voluntary work performed by the population in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a higher proportion of people who volunteered for an organisation or group.

Overall, 34.2% of the population reported performing voluntary work, compared with 27.8% for Regional SA.

## Emerging groups

The number of volunteers in Yorke Peninsula Council area increased by 168 people between 2011 and 2016.

# Yorke Peninsula Council area

## Unpaid domestic work

There has been increased interest in identifying, acknowledging and valuing the unpaid work that supports home and community life. The changing amount of time spent on unpaid housework in different **Household Types** and, particularly the distribution of this work within the household, can indicate the changing roles of males, females and older children in society. The level of unpaid domestic work in Yorke Peninsula Council area may also be related to **Household Income**, as higher income households are able to outsource some of these tasks.

## Unpaid domestic work

Yorke Peninsula Council area - Persons aged 15+ (Usual residence)	2016			2011			Change
Hours spent on unpaid domestic work	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016

## Dominant groups

---

Analysis of the unpaid domestic work performed by the population in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a higher proportion of persons who performed 15 hours or more of unpaid domestic work per week.

Overall, 29% of the population reported performing 15 hours or more of unpaid domestic work, compared with 25.4% for Regional SA.

The major differences between the share of the population performing unpaid domestic work in Yorke Peninsula Council area and Regional SA were:

- A *larger* percentage of persons who did unpaid domestic work (total) (13.8% compared to 11.5%)
- A *larger* percentage of persons who did 30 hours or more of domestic work (15.4% compared to 13.8%)
- A *smaller* percentage of persons who did between 5 and 14 hours of domestic work (16.3% compared to 18.4%)
- A *smaller* percentage of persons who did between 15 and 29 hours of domestic work (24.8% compared to 26.0%)

## Emerging groups

---

The largest changes in the number of people performing unpaid domestic work in Yorke Peninsula Council area, between 2011 and 2016 were those who:

- 30 hours or more (-172 persons)
- Between 5 and 14 hours (+143 persons)
- Did no unpaid domestic work (-111 persons)
- Did unpaid domestic work (+77 persons)

# Yorke Peninsula Council area

## Unpaid care

The proportion of people providing unpaid care for the aged and disabled in Yorke Peninsula Council area can be an important indicator of the level of demand for aged care services and facilities by local and state governments. An increasing proportion of carers among the population may indicate inadequate aged care provision, or the need for in-home support, or support for the carers themselves. The level of care provided by individuals is likely to be affected by **Household Income**, **Age Structure** and the ethnic makeup of the community (**Language Spoken**), as well as the sense of community cohesiveness.

## Unpaid care

Yorke Peninsula Council area - Persons aged 15+ (Usual residence)	2016			2011			Change
Assistance to a person with a disability, long term illness or old age	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016
Provided unpaid assistance	1,316	13.8	12.2	1,180	12.7	11.8	+136

## Dominant groups

Analysis of the unpaid care provided by the population in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a higher proportion of people who provided unpaid care either to family members or others.

Overall, 13.8% of the population provided unpaid care, compared with 12.2% for Regional SA.

## Emerging groups

---

The number of people who provided unpaid assistance to a person with a disability, long term illness or old age in Yorke Peninsula Council area increased by 136 between 2011 and 2016.

# Yorke Peninsula Council area

## Unpaid childcare

The role of unpaid childcare in Yorke Peninsula Council area is determined by many different factors. For example areas with high levels of unpaid child care may have a dominance of single income families with one significant earner, or there could be a lack of provision of paid child care in the area. The level to which people care for others children can also indicate the role of extended family (eg. grandparents caring for grandchildren, family day care).

The role of unpaid child care is a complex one so this topic should be viewed in conjunction with several others, including Household Type, Employment, Household Income and Educational Attendance.

## Unpaid childcare

Yorke Peninsula Council area - Persons aged 15+ (Usual residence)	2016			2011			Change
Unpaid child care	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016

## Dominant groups

---

Analysis of the unpaid child care provided by the population in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a lower proportion of people who provided unpaid child care either to their own or to other children. Overall, 20.5% of the population provided unpaid child care, compared with 26.2% for Regional SA.

The major differences between the share of the population providing unpaid child care in Yorke Peninsula Council area and Regional SA were:

- A *larger* percentage who did not provide care for children (71.7% compared to 64.3%)
- A *smaller* percentage who provided unpaid childcare for own child/ren (13.1% compared to 17.4%)
- A *smaller* percentage who provided unpaid childcare for other child/ren (6.9% compared to 7.9%)

## Emerging groups

---

The number of people who provided unpaid child care for their own and/or other people's children in Yorke Peninsula Council area decreased by 129 between 2011 and 2016.

The largest changes in the number of people performing unpaid child care in Yorke Peninsula Council area, between 2011 and 2016 were those who:

- Cared for own child/ren (-101 persons)
- No unpaid child care provided (+99 persons)

# Yorke Peninsula Council area

## Individual income

Individual Income statistics are an indicator of socio-economic status. With other data sources, such as Household Income, Qualifications and Occupation, they help tell the story of the economic opportunities and socio-economic status of Yorke Peninsula Council area. The amount of income an individual receives is linked to a number of factors including **employment status**, **age** (as for instance students and retirees often receive a lower income), qualifications and type of employment.

The incomes presented on this page are for the latest Census year only. For comparison of incomes over time, go to Individual Income Quartiles.

## Dominant groups

---

Analysis of individual income levels in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a lower proportion of people earning a high income (those earning \$1,750 per week or more) and a higher proportion of low income people (those earning less than \$500 per week).

Overall, 5.1% of the population earned a high income, and 48.2% earned a low income, compared with 6.5% and 41.9% respectively for Regional SA.

The major differences between Yorke Peninsula Council area's individual incomes and Regional SA's individual incomes were:

- A *larger* percentage of persons who earned \$300 - \$399 (15.3% compared to 11.9%)
- A *larger* percentage of persons who earned \$400 - \$499 (13.8% compared to 10.8%)
- A *larger* percentage of persons who earned \$500 - \$649 (10.3% compared to 9.1%)
- A *smaller* percentage of persons who earned \$800 - \$999 (6.7% compared to 8.3%)

# Yorke Peninsula Council area

## Individual income quartiles

Yorke Peninsula Council area's income statistics are an indicator of socio-economic status. With other data sources, such as [Household Income](#), [Qualifications](#) and [Occupation](#), they help tell the story of the area's economic opportunities and socio-economic status. Individual income levels are not comparable over time because of the influences of economic change such as wage level fluctuations and inflation. The income quartile method is the most objective method of comparing change in the income profile of a community over time.

A detailed explanation of how Individual Income quartiles are calculated and interpreted is available in [specific data notes](#).

## Dominant groups

Income quartiles allow us to compare relative income-earning capabilities across time. Analysis of the distribution of the population by income quartile in Yorke Peninsula Council area compared to Regional SA shows that there was lesser proportion of persons in the highest income quartile and a similar proportion in the lowest income quartile.

## Emerging groups

The most significant change in Yorke Peninsula Council area in persons between 2011 and 2016 was in the lowest quartile which showed a slight decrease of -369 persons.

# Yorke Peninsula Council area

## Household income

Households form the common 'economic unit' in our society. Yorke Peninsula Council area's Household Income is one of the most important indicators of socio-economic status. With other data sources, such as **Qualifications** and **Occupation**, it helps to reveal the economic opportunities and socio-economic status of Yorke Peninsula Council area. It is important to note that income data is not necessarily a measure of wealth. For example, if an area has a large number of retirees this will produce a higher proportion of households with low income but the retirees may have large capital wealth. For this reason, household income should be viewed in conjunction with **Age** and **Household Composition**.

The incomes presented on this page are for the latest Census year only. For comparison of incomes over time, go to **Household Income Quartiles**.

# Yorke Peninsula Council area

## Equivalised household income

While Household Income is a useful measure, it is difficult to tell if changes over time and between geographic areas are due to actual changes in income levels, or due to changes in household size and composition. For example, an increase in lower income households could be due to job losses in key economic sectors, or simply due to decreasing household size as adult children leave home.

Equivalised Household Income puts all households on an equal footing independent of household size and composition to enable a true comparison between areas and over time. It is an indicator of the income resource available to a household of standard size and is the best measure of the changing economic fortunes of households living in Yorke Peninsula Council area.

A detailed explanation of how Equivalised Household Income quartiles are calculated and interpreted is available in [specific data notes](#).

[Learn more about the characteristics of low-income households here.](#)

Compiled and presented in profile.id by .id, the population experts.

## Dominant groups

Equivalised income quartiles allow us to compare relative income-earning capabilities across time. Because the data is equivalised, households of different size and composition are placed on an equal footing.

Analysis of the distribution of households by income quartile in Yorke Peninsula Council area compared to Regional SA shows that there was a lesser proportion of households in the highest equivalised income quartile, and a greater proportion in the lowest equivalised income quartile.

## Emerging groups

The most significant change in Yorke Peninsula Council area between 2011 and 2016 was in the lowest quartile which showed a slight decrease of -92 households.

# Yorke Peninsula Council area

## Household type

Yorke Peninsula Council area's household and family structure is one of the most important demographic indicators. It reveals the area's residential role and function, era of settlement and provides key insights into the level of demand for services and facilities as most are related to age and household types.

To continue building the story, Yorke Peninsula Council area's Household Summary should be viewed in conjunction with Households with Children, Households without Children, Household Size, Age Structure and Dwelling Type.

## Household type

Yorke Peninsula Council area - Total households (Enumerated)	2016			2011			Change
Households by type	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016
Couples with children	865	17.2	22.8	910	18.3	24.6	-45
Couples without children	1,789	35.5	29.6	1,821	36.6	30.4	-32

## Dominant groups

---

Analysis of the household/family types in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a lower proportion of couple families with child(ren) as well as a lower proportion of one-parent families. Overall, 17.2% of total families were couple families with child(ren), and 5.8% were one-parent families, compared with 22.8% and 9.0% respectively for Regional SA.

There were a higher proportion of lone person households and a higher proportion of couples without children. Overall, the proportion of lone person households was 31.7% compared to 27.9% in Regional SA while the proportion of couples without children was 35.5% compared to 29.6% in Regional SA.

## Emerging groups

---

The number of households in Yorke Peninsula Council area increased by 56 between 2011 and 2016.

**The largest change in family/household types in Yorke Peninsula Council area between 2011 and 2016 was:**

- Lone person (+118 households)

# Yorke Peninsula Council area

## Households with children

Households with Children require different services and facilities than other household types, and their needs change as both adults and children age. When many families in an area are at the same stage in their individual lifecycles, it creates a suburb lifecycle. Knowing where a suburb is in a cycle of change helps planners make evidence-based decisions about the demand for services both now and in the future.

For Households with Children in Yorke Peninsula Council area, life stage is based on the age of children in the household. The age of the parent(s) is not taken into account.

- **Young children:** Children aged under 15 only
- **Mixed age children:** One or more children under 15 and one or more children over 15 (must have 2 or more children)
- **Older children:** Children aged 15 and over only

To continue building the story, Yorke Peninsula Council area's Household data should be viewed in conjunction with Household Size, Age Structure and Dwelling Type.

## Households with children by life stage

Yorke Peninsula Council area - Households (Enumerated)	2016			2011			Change
Households with children	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016
Couples with children	865	17.2	22.8	910	18.3	24.6	-45

## Dominant groups

---

Analysis of the families with children in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a smaller proportion of couples with young children, as well as a smaller proportion of couples with older children.

Overall, 9.6% of total households with children were couple with young children, and 5.4% were couples with older children, compared with 12.6% and 6.7% respectively for Regional SA.

There were a smaller proportion of single parent households with young children and a smaller proportion of single parent households with older children. Overall, the proportion of single parent households with young children was 2.1% compared to 3.9% in Regional SA while the proportion of single parent households with older children was 3.0% compared to 4.0% in Regional SA.

## Emerging groups

---

Between 2011 and 2016, the number of households with children decreased by 70 households or 5.7%.

*There were no major differences between 2011 and 2016 in Yorke Peninsula Council area.*

# Yorke Peninsula Council area

## Households without children

Households without Children include couples without children and lone person households. They require different services depending on the age of the people in the households. For example young couples who have not had children (yet) compared to older "empty nester" couples whose children may have left home.

For Households without Children in Yorke Peninsula Council area, life stage is based on the age of the household reference person (usually person 1 on the Census form):

- **Young:** Aged 15-44
- **Middle-aged:** Aged 45-64
- **Older:** Aged 65 and over

To continue building the story, Yorke Peninsula Council area's Household data should be viewed in conjunction with Household Size, Age Structure and Dwelling Type.

## Households without children by life stage

Yorke Peninsula Council area - Households (Enumerated)	2016			2011			Change
Households without children	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016
Couples without children	1,789	35.5	29.6	1,821	36.6	30.4	-32
Young couples without children	117	2.3	4.0	136	2.7	4.6	-19
Middle-aged couples without children	702	13.9	11.8	788	15.8	13.7	-86
Older couples without children	970	19.3	13.8	897	18.0	12.1	+73

## Dominant groups

---

Analysis of the households without children in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a smaller proportion of young couples without children, a larger proportion of middle-aged couples without children, and a larger proportion of older couples without children.

In addition, there were a smaller proportion of young lone person households, a larger proportion of middle-aged lone person households, and a larger proportion of older lone person households.

## Emerging groups

---

Between 2011 and 2016, the number of households without children increased by 100.

The largest changes in households without children in Yorke Peninsula Council area, between 2011 and 2016 were:

- Older lone persons (+150 persons)
- Middle-aged couples without children (-86 persons)
- Older couples without children (+73 persons)

# Yorke Peninsula Council area

## Household size

The size of households in general follows the life-cycle of families. Households are usually small at the stage of relationship formation (early marriage), and then increase in size with the advent of children. They later reduce in size again as these children reach adulthood and leave home. Household size can also be influenced by a lack (or abundance) of affordable housing. Overseas migrants and indigenous persons often have a tradition of living with extended family members which significantly affects household size.

Household size in Australia has declined since the 1970s but between 2006 and 2016, the average household size remained stable for the nation as a whole.

An increasing household size in an area may indicate a lack of affordable housing opportunities for young people, an increase in the birth rate or an increase in family formation in the area. A declining household size may indicate children leaving the area when they leave home, an increase in retirees settling in the area, or an attraction of young singles and couples to the area.

For greater insight, Yorke Peninsula Council area's Household Size data should be viewed in conjunction with Household Summary, Age Structure, Dwelling Type, Household Income and Language Spoken at Home.

## Household size

Yorke Peninsula Council area - Households (Enumerated)	2016			2011			Change
Number of persons usually resident	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016

## Dominant groups

Analysis of the number of persons usually resident in a household in Yorke Peninsula Council area compared with Regional SA shows that there were a higher proportion of lone person households, and a lower proportion of larger households (those with 4 persons or more). Overall there were 34.2% of lone person households, and 13.6% of larger households, compared with 30.3% and 19.0% respectively for Regional SA.

The major differences in the household size for Yorke Peninsula Council area and Regional SA were:

- A *larger* percentage of households with 2 persons usually resident (42.8% compared to 38.4%)
- A *larger* percentage of households with 1 person usually resident (34.2% compared to 30.3%)
- A *smaller* percentage of households with 4 persons usually resident (7.4% compared to 11.5%)
- A *smaller* percentage of households with 3 persons usually resident (9.3% compared to 12.3%)

## Emerging groups

The number of households in Yorke Peninsula Council area increased by 42 between 2011 and 2016.

The largest changes in the number of persons usually resident in a household in Yorke Peninsula Council area between 2011 and 2016 were:

- 1 person (+111 households)
- 4 persons (-76 households)

# Yorke Peninsula Council area

## Family blending

Information on blended and intact families can be an indicator of the level of family breakup and repartnering within the area, and a potential indicator of socio-economic disadvantage. Family blending only applies to couple families with children. For information more broadly about household and family types, including single-parent families, please see [Household Type](#), [Households with Children](#), and [Households without Children](#).

## Family blending

Yorke Peninsula Council area - Total couples with children (Enumerated)	2016			2011			Change
Family blending by type	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016
Intact Family	754	87.5	85.9	796	88.2	85.8	-42
Step family	58	6.7	7.7	67	7.4	7.9	-9

## Dominant groups

Analysis of the family blending in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a lower proportion of step families as well as a lower proportion of blended families. Overall, 6.7% of total couple families with children were step families, and 4.8% were blended families, compared with 7.7% and 5.4% respectively for Regional SA.

There were a similar proportion of other families and a higher proportion of couples without children. Overall, the proportion of other families was 1.0% compared to 0.9% in Regional SA while the proportion of intact families was 87.5% compared to 85.9% in Regional SA.

## Emerging groups

---

The number of couple families with children in Yorke Peninsula Council area decreased by 40 between 2011 and 2016.

*There were no major differences in Yorke Peninsula Council area between 2011 and 2016.*

# Yorke Peninsula Council area

## Dwelling type

Dwelling Type is an important determinant of Yorke Peninsula Council area's residential role and function. A greater concentration of higher density dwellings is likely to attract more young adults and smaller households, often renting. Larger, detached or separate dwellings are more likely to attract families and prospective families. The residential built form often reflects market opportunities or planning policy, such as building denser forms of housing around public transport nodes or employment centres.

Dwelling Type statistics should be viewed in conjunction with **Household Size**, **Household Types**, **Housing Tenure** and **Age Structure** for a more complete picture of the housing market in Yorke Peninsula Council area.

## Dwelling structure

Yorke Peninsula Council area - Dwellings (Enumerated)	2016			2011			Change
Dwelling type	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016

# Dominant groups

In 2016, there were 9,138 separate houses in the area, 277 medium density dwellings, and no high density dwellings. In addition, there were 194 caravans/cabins/houseboats in the area.

Analysis of the types of dwellings in Yorke Peninsula Council area in 2016 shows that 94.1% of all dwellings were separate houses; 2.9% were medium density dwellings, and 0% were in high density dwellings, compared with 86.1%, 10.5%, and 0.1% in the Regional SA respectively.

In 2016, a total of 51.6% of the dwellings in Yorke Peninsula Council area were occupied on Census night, compared to 77.7% in Regional SA. The proportion of unoccupied dwellings was 48.2%, which is larger compared to that found in Regional SA (21.9%).

# Emerging groups

The total number of dwellings in Yorke Peninsula Council area increased by 228 between 2011 and 2016.

The largest change in the type of dwellings found in Yorke Peninsula Council area between 2011 and 2016 was:

- Separate house (+198 dwellings)

# Yorke Peninsula Council area

## Number of bedrooms per dwelling

The Number of Bedrooms in a dwelling is an indicator of the size of dwellings, and when combined with Dwelling Type information, provides insight into the role Yorke Peninsula Council area plays in the housing market. For example, an area of high density dwellings that are predominantly 1-2 bedroom are likely to attract students, single workers and young couples, whereas a high density area with dwellings that are predominantly 2-3 bedroom may attract more empty nesters and some families.

In combination with Household Type and Household Size, the Number of Bedrooms can also indicate issues around housing affordability, overcrowding and other socio-economic factors.

## Number of bedrooms per dwelling

Yorke Peninsula Council area - Households (Enumerated)	2016			2011			Change
Number of bedrooms	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016
0 or 1 bedrooms	258	5.1	4.1	267	5.4	4.5	-9

## Dominant groups

---

Analysis of the number of bedrooms in dwellings in Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a higher proportion of dwellings with 2 bedrooms or less, and a lower proportion of dwellings with 4 or more bedrooms.

Overall, 23.4% of households were in dwellings with 2 bedrooms or less, and 21.0% of 4 or more bedroom dwellings, compared with 19.5% and 23.2% for Regional SA respectively.

The major differences between the number of bedrooms per dwelling of Yorke Peninsula Council area and Regional SA were:

- A *larger* percentage of 2 bedroom dwellings (18.3% compared to 15.4%)
- A *larger* percentage of dwellings with 1 or no bedrooms (includes bedsitters) (5.1% compared to 4.1%)
- A *smaller* percentage of 4 bedroom dwellings (17.9% compared to 20.0%)

## Emerging groups

---

*There were no major differences in Yorke Peninsula Council area between 2011 and 2016.*

# Yorke Peninsula Council area

## Internet connection

An internet connection is now an important utility for most households in Australia. It is increasingly required for accessing essential information and taking part in the digital economy. Australia-wide in 2016, nearly 80% of all households had internet access. However, this decreases with age – seniors are less likely to have internet access at home. The lack of internet access is likely to indicate a level of disadvantage and could be related to socio-economic factors, age, or geographical isolation.

Internet connectivity in Yorke Peninsula Council area should be looked at in conjunction with **Household Type** and **Age Structure**, as well as **Education Levels**.

## Type of internet connection

Yorke Peninsula Council area - Households	2016			2011			Change
Connection type	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016
Internet connection	3,483	69.2	70.9	3,036	60.9	64.8	+447
No internet connection	1,273	25.3	21.4	1,709	34.3	28.8	-436
Not stated	275	5.5	7.7	242	4.9	6.4	+33
Total households	5,031	100.0	100.0	4,987	100.0	100.0	+44

## Dominant groups

Analysis of the type of internet connection of households in Yorke Peninsula Council area compared to Regional SA shows that there was a lower proportion of households with an internet connection

Overall 69.2% of households had an internet connection, compared with 70.9% in Regional SA.

## Emerging groups

---

Between 2011 and 2016 the number of households with an internet connection increased by 447.

# Yorke Peninsula Council area

## Number of cars per household

The ability of the population to access services and employment is strongly influenced by access to transport. The number of motor vehicles per household in Yorke Peninsula Council area quantifies access to private transport and will be influenced by **Age Structure** and **Household Type**, which determine the number of adults present; access to **Public Transport**; distance to shops, services, employment and education; and **Household Income**. Depending on these factors, car ownership can be seen as a measure of advantage or disadvantage, or a neutral socio-economic measure, which impacts on the environment and quality of life.

## Car ownership

Yorke Peninsula Council area - Households (Enumerated)	2016			2011			Change
Number of cars	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016
No motor vehicles	209	4.2	5.6	238	4.8	6.7	-29

## Dominant groups

---

Analysis of the car ownership of the households in Yorke Peninsula Council area in 2016 compared to Regional SA shows that 89.0% of the households owned at least one car, while 4.2% did not, compared with 85.7% and 5.6% respectively in Regional SA.

Of those that owned at least one vehicle, there was a larger proportion who owned just one car; a larger proportion who owned two cars; and a similar proportion who owned three cars or more.

Overall, 34.9% of the households owned one car; 34.6% owned two cars; and 19.6% owned three cars or more, compared with 32.2%; 33.5% and 20.1% respectively for Regional SA.

## Emerging groups

---

The largest change in the household car ownership in Yorke Peninsula Council area between 2011 and 2016 was:

- 1 motor vehicle (-101 households)

# Yorke Peninsula Council area

## Housing tenure

Yorke Peninsula Council area's Housing Tenure data provides insights into its socio-economic status as well as the role it plays in the housing market. For example, a high concentration of private renters may indicate a transient area attractive to young singles and couples, while a concentration of home owners indicates a more settled area with mature families and empty-nesters (**Household Summary**). Tenure can also reflect built form (**Dwelling Type**), with a significantly higher share of renters in high density housing and a substantially larger proportion of home-owners in separate houses, although this is not always the case.

In conjunction with other socio-economic status indicators in Yorke Peninsula Council area, Tenure data is useful for analysing housing markets, housing affordability and identifying public housing areas.

## Housing tenure

Yorke Peninsula Council area - Households (Enumerated)	2016			2011			Change
Tenure type	Number	%	Regional SA%	Number	%	Regional SA%	2011 to 2016

## Dominant groups

---

Analysis of the housing tenure of households of Yorke Peninsula Council area in 2016 compared to Regional SA shows that there was a larger proportion of households who owned their dwelling; a smaller proportion purchasing their dwelling; and a smaller proportion who were renters.

Overall, 52.7% of households owned their dwelling; 21.7% were purchasing, and 18.7% were renting, compared with 35.5%, 29.3% and 26.0% respectively for Regional SA.

## Emerging groups

---

The largest changes in housing tenure categories for the households in Yorke Peninsula Council area between 2011 and 2016 were:

- Mortgage (+83 households)
- Renting - Private (-53 households)

The total number of households in Yorke Peninsula Council area increased by 35 between 2011 and 2016.

# Yorke Peninsula Council area

## Housing loan repayments

Mortgage repayments are directly related to house prices in Yorke Peninsula Council area, length of occupancy and the level of equity of home owners. When viewed with **Household Income** data it may also indicate the level of housing stress households in the community are under. In mortgage belt areas it is expected that households will be paying a higher proportion of their income on their housing compared to well-established areas. First home buyer areas are also likely to have larger mortgages than upgrader areas where households move in with equity from elsewhere.

Mortgage payment levels are not directly comparable over time because of inflation. For comparison of mortgage payments over time, go to **Housing Loan Quartiles**.

## Monthly housing loan repayments

Yorke Peninsula Council area - Households (Enumerated)	2016		
Monthly repayment amount	Number	%	Regional SA%
\$299 or less	115	10.6	6.7
\$300 - \$599	139	12.9	9.8
\$600 - \$999	264	24.4	20.8
\$1,000 - \$1,199	139	12.9	11.9
\$1,200 - \$1,399	115	10.6	11.8
\$1,400 - \$1,599	83	7.7	8.7
\$1,600 - \$1,799	63	5.8	7.7
\$1,800 - \$1,999	35	3.2	4.2

## Dominant groups

---

Analysis of the monthly housing loan repayments of households in Yorke Peninsula Council area compared to Regional SA shows that there was a smaller proportion of households paying high mortgage repayments (\$2,600 per month or more), and a larger proportion of households with low mortgage repayments (less than \$1,200 per month).

Overall, 3.0% of households were paying high mortgage repayments, and 60.8% were paying low repayments, compared with 6.2% and 49.2% respectively in Regional SA.

**The major differences between the household loan repayments of Yorke Peninsula Council area and Regional SA were:**

- A *larger* percentage of \$299 or less (10.6% compared to 6.7%)
- A *larger* percentage of \$600 - \$999 (24.4% compared to 20.8%)
- A *larger* percentage of \$300 - \$599 (12.9% compared to 9.8%)
- A *smaller* percentage of \$2,000 - \$2,199 (3.3% compared to 5.3%)

# Yorke Peninsula Council area

## Housing loan quartiles

Mortgage repayments in Yorke Peninsula Council area are directly related to house prices, length of occupancy and the level of equity of home owners. When viewed with Household Income data it may also indicate the level of housing stress in the community.

The quartile method is the most objective method of comparing change in the mortgage payment profile of a community over time.

A detailed explanation of how Housing Loan Repayment quartiles are calculated and interpreted is available in specific data notes.

## Housing loan quartiles

## Dominant groups

Housing loan repayment quartiles allow us to compare relative repayment liabilities across time. Analysis of the distribution of households by housing loan repayment quartiles in Yorke Peninsula Council area compared to Regional SA shows that there was a smaller proportion of households in the highest repayment quartile, and a larger proportion in the lowest repayment quartile.

## Emerging groups

The total number of households with a mortgage in Yorke Peninsula Council area increased by 89 between 2011 and 2016. The most significant change in Yorke Peninsula Council area during this period was in the lowest quartile which showed an increase of 51 households.

# Yorke Peninsula Council area

## Housing rental payments

Rental payments can be a better measure of the cost of housing in Yorke Peninsula Council area than mortgage repayments because they are not contingent on length of occupancy or equity in the dwelling.

High rental payments may indicate desirable areas with mobile populations who prefer to rent, or a housing shortage, or gentrification. Low rental payments may indicate public housing (check **Tenure Type**), or areas where low income households move by necessity for a lower cost of living.

Rental payments are not directly comparable over time because of inflation. For comparison of rental payments over time, go to [Housing Rental Quartiles](#).

## Weekly housing rental payments

Yorke Peninsula Council area - Households (Enumerated)		2016		
Weekly rental amount	Number	%	Regional SA%	
\$99 or less	218	23.0	15.7	
\$100 - \$149	131	13.8	14.5

## Dominant groups

Rental payment quartiles allow us to compare relative rental liabilities across time. Analysis of the distribution of households by rental payment quartiles in Yorke Peninsula Council area compared to Regional SA shows that there was a smaller proportion of households in the highest payment quartile, and a larger proportion in the lowest payment quartile.

## Emerging groups

The total number of households renting their dwelling in Yorke Peninsula Council area decreased by 42 between 2011 and 2016. The most significant change during this period was in the medium lowest quartile which showed a slight decrease of -36 households.

# RDA Yorke and Mid North Region

## Migration summary

In RDA Yorke and Mid North Region, a higher rate of people did not change address (62.3%), while a lower rate (28.9%) moved from elsewhere in Australia, and a lower rate (0.8%) moved from overseas. A total of 11,212 people, or 54.5% of those who moved within Australia, moved within RDA Yorke and Mid North Region.

Migration, or residential mobility, together with births and deaths are significant components of population change in Australia. Migration is the most volatile component of population change and can be affected by changing housing and economic opportunities such as housing affordability issues or the mining boom. The three main types of migration are overseas migration, interstate migration and within-state migration, of which within-state is the most common and largely involves moves between neighbouring areas within an urban or regional setting.

Looking at the level and type of migration in RDA Yorke and Mid North Region can indicate whether the population is sedentary and likely to be in the area for a long time (and perhaps have significant ties to the community), or transient, and likely to move on. Related topics which can be viewed to get a clearer picture of population mobility include **Age Structure** (young adults are likely to move more often) and **Housing Tenure** (generally renters move more often while home ownership indicates a more stable population).

This table shows the broad trends of movement between RDA Yorke and Mid North Region and the states/territories of Australia, and from overseas over the 5 years from 2011-2016. For more detail on local movements within the state, please refer to the [Migration by age by location](#) page.

## Migration between the area and other States/Territories

# RDA Yorke and Mid North Region

## Migration by age

The age structure of people who move into and out of RDA Yorke and Mid North Region is strongly influenced by the residential role and function of the area and can influence demand for particular services. For instance, inner city areas near employment, education and entertainment tend to attract many young people in their late teens and early twenties, who move out in their late twenties and thirties to start families in suburban areas. Rural areas tend to lose young people and gain older families and retirees.

Understanding RDA Yorke and Mid North Region's attraction to different age groups helps to plan services for the community as well as advocating with other levels of government and private enterprise to provide infrastructure, employment opportunities and facilities which may help to retain age groups which are otherwise leaving the area.

## Migration by age group 2016

# RDA Yorke and Mid North Region

## Residential building approvals

RDA Yorke and Mid North Region's building approvals are used as a leading indicator of the general level of residential development, economic activity, employment and investment. Residential building activity depends on many factors that vary with the state of the economy including interest rates, availability of mortgage funds, government spending, and business investment. Large financial changes or shocks, such as the Global Financial Crisis of 2008/09 can be observed in the data. However, the number of building approvals can fluctuate substantially from year to year simply as a result of the short-term nature of many construction projects, and the cyclical nature of the industry.

## Workers' place of residence

Where does RDA Yorke and Mid North Region's workforce come from? Journey to Work data sheds light on how many workers live locally, how many commute from other areas and which areas they commute from. Some areas attract a large external workforce because they have major employment centres or because local residents have a different set of skills or aspirations than the local jobs require. Understanding where workers reside assists in planning and advocacy for roads and public transport provision. It also helps to clarify economic and employment drivers across areas and assists in understanding the degree to which RDA Yorke and Mid North Region provides local employment.

## Overview

# RDA Yorke and Mid North Region

## Residents' place of work

Where do RDA Yorke and Mid North Region's residents go to work? Journey to Work data shows how many residents work locally, and how many commute out of the area and where they commute to. Some areas consist mainly of dormitory' suburbs and the majority of the residents commute out to work. Other areas have large employment centres which attract a local workforce. Understanding where RDA Yorke and Mid North Region's residents go to work assists in planning and advocacy for roads and public transport provision. It also helps to clarify the economic and employment drivers across areas and assists in understanding the degree of employment self-containment within RDA Yorke and Mid North Region.

## Overview

### Employment location of resident workers

RDA Yorke and Mid North Region		2016	
Location	Number	%	
Live and work in the area	25,257	87.3	
▪ Live and work in the same LGA	22,446	77.5	
▪ Live in the area and work in different LGA	2,811	9.7	
Live in the area, but work outside	2,434	8.4	
No fixed place of work	1,253	4.3	
Total employed residents in the area	28,944	100.0

# RDA Yorke and Mid North Region

## SEIFA by Local Government Area

RDA Yorke and Mid North Region SEIFA Index of Disadvantage measures the relative level of socio-economic disadvantage based on a range of Census characteristics. It is a good place to start to get a general view of the relative level of disadvantage in one area compared to others and is used to advocate for an area based on its level of disadvantage.

The index is derived from attributes that reflect disadvantage such as low income, low educational attainment, high unemployment, and jobs in relatively unskilled occupations. When targeting services to disadvantaged communities, it is important to also look at these underlying characteristics as they can differ markedly between areas with similar SEIFA scores and shed light on the type of disadvantage being experienced.

A higher score on the index means a *lower* level of disadvantage. A lower score on the index means a *higher* level of disadvantage.

Please note that the LGAs listed here relate to the boundary which was current at the 2016 Census. Boundary changes since that time will not be reflected in the list. For recent boundary changes in the local area please see the [SEIFA by profile area](#)

# RDA Yorke and Mid North Region

## SEIFA by profile area

RDA Yorke and Mid North Region SEIFA Index of Disadvantage measures the relative level of socio-economic disadvantage based on a range of Census characteristics. It is a good place to start to get a general view of the relative level of disadvantage in one area compared to others and is used to advocate for an area based on its level of disadvantage.

The index is derived from attributes that reflect disadvantage such as low income, low educational attainment, high unemployment, and jobs in relatively unskilled occupations. When targeting services to disadvantaged communities, it is important to also look at these underlying characteristics as they can differ markedly between areas with similar SEIFA scores and shed light on the type of disadvantage being experienced.

A higher score on the index means a *lower* level of disadvantage. A lower score on the index means a *higher* level of disadvantage.

The percentile column indicates the approximate position of this small area in a ranked list of Australia's suburbs and localities. It's meant to give an indication of where the area sits within the whole nation. A higher number indicates a higher socio-economic status. For instance, a percentile of 72 indicates that approximately 72% of Australia's suburbs have a SEIFA index lower than this area (more disadvantaged), while 28% are higher.

# RDA Yorke and Mid North Region

## About the community profile

Demographic change across Australia is recorded by the Australian Bureau of Statistics (ABS) in the Census collections every five years. Population experts, .id, analyse and convert these raw figures into stories of place to inform council staff, community groups, investors, business, students and the general public.

RDA Yorke and Mid North Region Regional Profile provides demographic analysis for the Region and its suburbs based on results from the 2016, 2011, 2006, 2001, 1996 and 1991 Censuses of Population and Housing. The profile is updated with population estimates when the Australian Bureau of Statistics (ABS) releases new figures such as the annual Estimated Resident Population (ERP).

Suburb boundaries and Census questions change over time, but .id manages the data to ensure that there is an accurate time series provided for the current geographic boundaries. You can read more about this in the [Geography Notes](#) section.

Results for RDA Yorke and Mid North Region include population, age structure, ethnicity, ancestry, religion, income, qualifications, occupations, employment, unemployment, disability, disadvantage, volunteering, childcare, family structure, household structure, housing tenure, mortgage and rental payments, and the size and type of the dwellings people live in.

The Community Profile presents this information in clear maps, tables and charts with concise factual commentary to answer three important questions:

1. What are the characteristics of the people who live here?
2. How are they changing?
3. How do they compare to other areas?

This provides the basis for making evidence-based decisions about how to provide services for the community as it changes.

You can be confident about the quality of the information as it is derived from Australian Bureau of Statistics data, analysed and presented by population experts and funded by RDA Yorke and Mid North Region.

# RDA Yorke and Mid North Region

## About the area

## Name origin

The Yorke Peninsula Council is named after the Yorke Peninsula, which was named by Captain Matthew Flinders after the Right Honourable Charles Philip Yorke.

## Location and boundaries

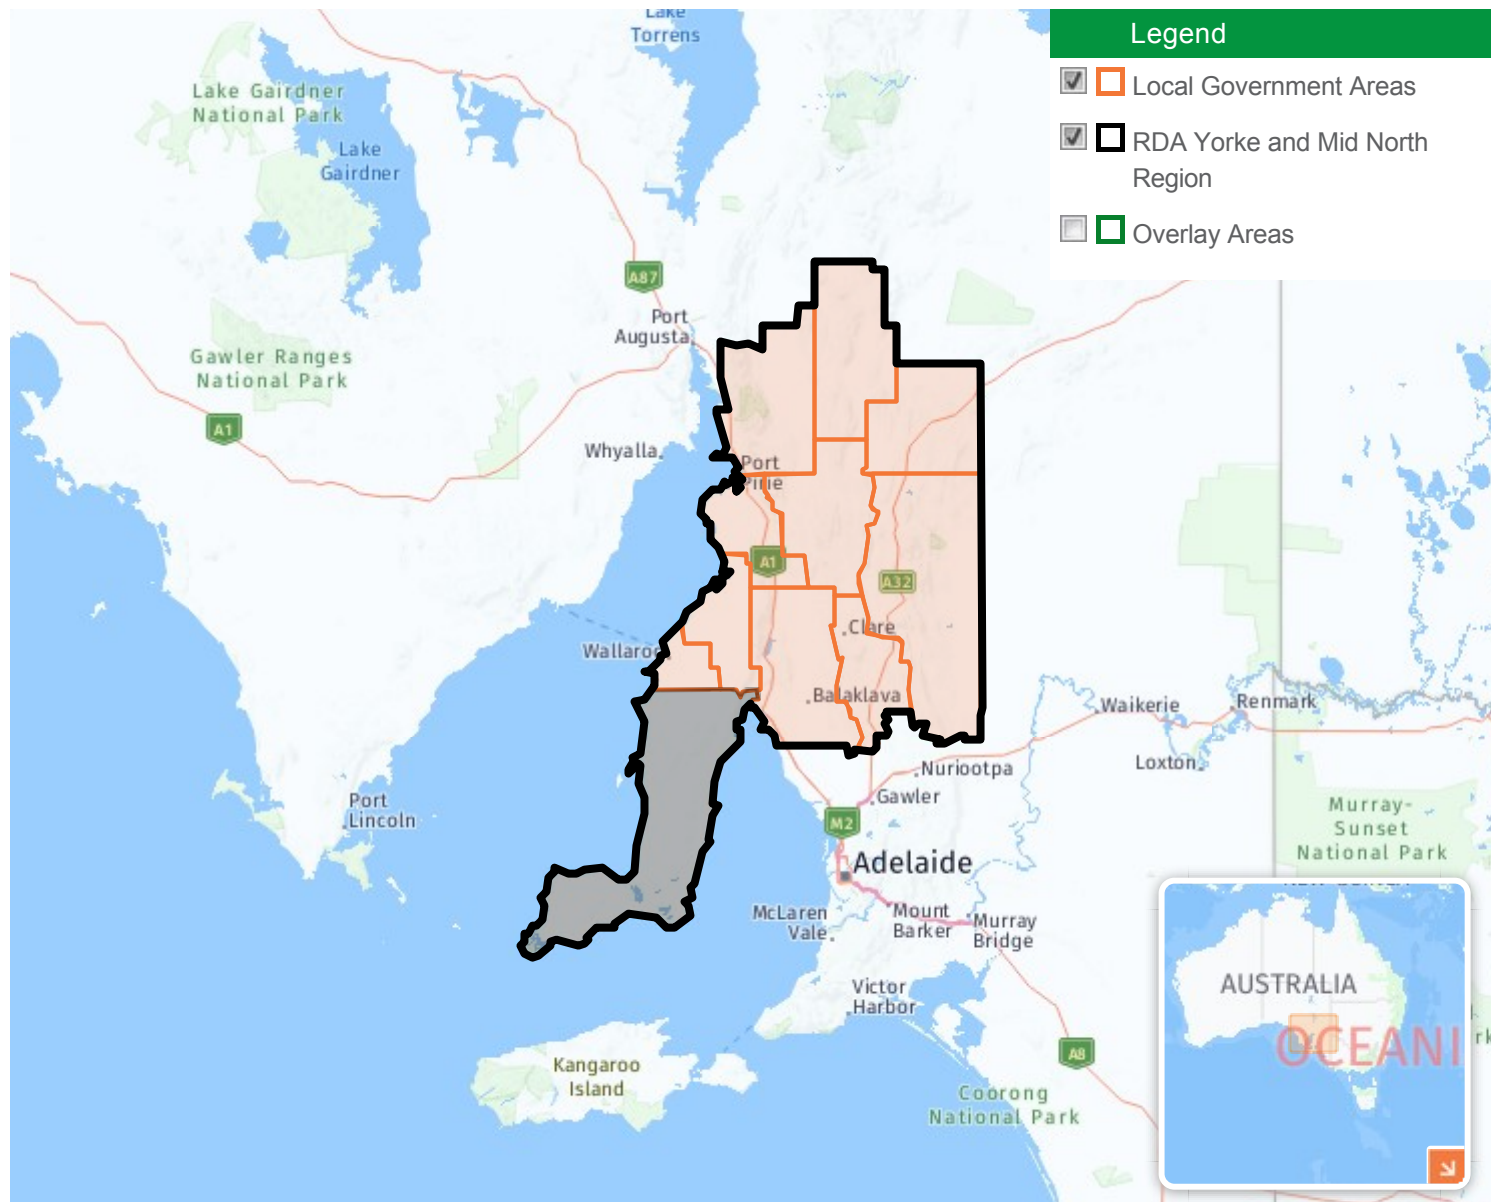

The Yorke Peninsula Council area is located in the Yorke and Mid North Region of South Australia, between 150 and 300 kilometres north-west and west of the Adelaide CBD. The Yorke Peninsula Council area is bounded by the Copper Coast Council area and the Barunga West Council area in the north, the Wakefield Regional Council area in the north-east, Gulf St Vincent in the east and south, and Spencer Gulf in the west.

## Included areas

The Yorke Peninsula Council area includes the localities of Agery, Ardrossan, Arthurton, Balgowan, Black Point, Bluff Beach, Brentwood, Chinaman Wells, Clinton, Clinton Centre, Coobowie, Corny Point, Couch Beach, Cunningham, Curramulka, Dowlingville, Edithburgh, Foul Bay, Hardwicke Bay, Honiton, Inneston, James Well, Kainton, Koolywurtie, Maitland, Marion Bay, Minlaton, Nalyappa, Parsons Beach, Petersville, Pine Point, Point Pearce, Point Souttar, Point Turton, Port Arthur, Port Julia, Port Moorowie, Port Rickaby, Port Victoria, Port Vincent, Price, Ramsay, Rogues Point, Sandilands, Sheaoak Flat, South Kilkerran, Stansbury, Sultana Point, Sunnyvale, The Pines, Tiddy Widdy Beach, Urania, Warooka, Wauralte, Weetulta, White Hut, Winulta, Wool Bay, Yorke Valley and Yorketown.

# Economic region

Yorke Peninsula Council area

Compiled and presented in economy.id by .id, the population experts.

## Land use

The Yorke Peninsula Council area is predominantly rural, with the main township being Ardrossan, small townships at Edithburgh, Maitland, Minlaton, Port Victoria, Port Vincent, Stansbury, Warooka and Yorketown, and numerous small villages and holiday settlements. Rural land is used largely for agriculture (particularly grain growing and sheep and cattle grazing), with salt production, mining, fishing and tourism also being important industries. The Council area encompasses a total land area of nearly 6,000 square kilometres.

## Transport

The Yorke Peninsula Council area is served by the Spencer Highway, the St Vincent Highway, the Yorke Highway, the Port of Ardrossan, Klein Point Port and Port Giles.

## Settlement history

European settlement of the area dates from the 1840s, with land used mainly for sheep grazing and grain growing. Growth took place during the late 1800s, spurred by the establishment of mining, sand quarrying and salt production, and the transport of grain and minerals via several ports, including Ardrossan Port. Numerous small townships were established from the 1870s. A large dolomite mine was established by BHP near Ardrossan in 1950. A deep water port was constructed at Port Giles (Coobowie) in 1970, becoming the main port for exporting grain and seeds. The population has been relatively stable in recent decades.

## Indigenous background

The original inhabitants of the Yorke Peninsula Council area were the Nharangga Aboriginal people.

## Population

The Estimated Resident Population (ERP) is the official population of the area. It is updated annually by the Australian Bureau of Statistics, and reassessed every Census. The chart and table show last 10 years ERP for RDA Yorke and Mid North Region, the state and Australia, with percentage comparisons. A growing population can indicate a growing economy, but this is not necessarily the case and depends on the residential role and function of the area.

## Gross product

The Gross Regional Product of an area is the equivalent of Gross Domestic Product, but for a smaller area. It is the amount of the nation's wealth which is generated by businesses, organisations and individuals working in the area. This dataset is derived from the National Economics microsimulation model, and is a broad indicator of the growth or decline of the local economy over time. Data are presented for each year back to 2002.

## Local employment

This indicator shows the estimated number of jobs in the local area, on an annual basis back to 2001. The dataset is derived from the National Economics microsimulation model, based on the ABS labour force survey, and is generally higher than the figure provided by Census, because it is updated every year, and is not subject to Census undercount.

A count of jobs is one of the most fundamental economic indicators of the size of the local economy, and increasing numbers of jobs generally represent a growing economy. However, jobs are not necessarily full-time and the value of a job varies across areas. For this reason, jobs numbers should be viewed in conjunction with Employment by industry (FTE) and Worker Productivity datasets.

## Industry composition

Understanding the economic role of RDA Yorke and Mid North Region provides a framework for understanding what policy responses and investment may be appropriate to support the growth of businesses and maintenance of a vibrant economy in the future.

The charts and table below give a broad overview of the role and function of your economy. It helps answer questions such as:

- How much of the RDA Yorke and Mid North Region's economy is driven by meeting the local population needs?
- What proportion of jobs in the area are in goods production or selling of products?
- In which broad sectors are the key strengths of the local economy?
- What contribution do business services make in your area and is it growing?
- Is there a presence of local, state and federal government workers in in the area?

Once you have developed a broad picture of your economy, you can then drill down further with all the detail [here](#).

# Yorke Peninsula Council area

## Employed residents

This indicator shows the estimated number of employed residents of the local area, on an annual basis back to 2001. Employed residents may have a workplace anywhere, inside or outside the area. The dataset is derived from the National Economics microsimulation model, based on the ABS labour force survey.

A growing number of resident employed can indicate a growing economy, or a growing residential population, supplying labour to other areas. To build a more complete picture of the residential economy, this dataset should be viewed in conjunction with [Local employment](#), [Employment self-containment](#), [Residents place of work by industry](#) and [Residents place of work by occupation](#) datasets.

## Unemployment

The unemployment rate is derived from the ABS labour force survey and Centrelink data and compiled by the Department of Employment. It is published quarterly in the Small Area Labour Markets publication, for Local Government Areas. The unemployment rate shown here is the proportion of the resident labour force (those in work or looking for work and aged over 15) who are looking for work. Unemployment does not include people who don't have a job but are not seeking a job.

Unemployment is an important indicator of the economic success of an area. A low unemployment rate can indicate an affluent area with a high rate of access to jobs, or a place where those who can't find jobs leave the area. A high rate can indicate a declining economy with closures of key industries, or a residential area with a significantly disadvantaged population.

Note: The Department of Employment advise that **highly disaggregated labour force and unemployment estimates at the LGA level can display significant variability and should be viewed with caution**. The figures are smoothed using a four-quarter (annual) average to minimise the variability inherent in small area estimates.

This page presents unemployment estimates for benchmark regions which are headline figures widely published by government and media sites but are not directly comparable to the LGA estimates as they are not annual averages. For more information, see the data notes.

## Building approvals

This dataset shows the total assessed value of building approvals for construction in RDA Yorke and Mid North Region by financial year in millions of dollars. The dataset is updated monthly to include the current financial year to date, and includes residential and non-residential building approvals separately. The percentage of the state total is shown.

Building approvals for an area can be highly variable over time, particularly in the non-residential sector. Construction may take several years from the date of approval. A high rate of building approvals can indicate a growth area with a construction-led economy. A low rate of building approvals may indicate a settled area with established infrastructure, or an area with little growth. Note that this dataset is not adjusted for inflation.

## Consumer Price Index

The Consumer Price Index is an indicator of the inflation rate run by the Australian Bureau of Statistics. It measures the changing price of a fixed basket of goods and services purchased by the average household in 8 capital cities around Australia. This is combined into an index number, calculated quarterly, and the percentage change for the year to the latest quarter is shown.

Data on CPI is a proxy for the rate of inflation in the consumer sector, and does not necessarily translate into inflation for goods purchased by industry. However it is an easily accessible measure of the inflation rate and can be used to assess the changing value of money over time. CPI is not available for small areas, so the nearest capital city rate is shown on economy.id.

## Employment by industry (FTE)

Full-time equivalent (FTE) employment is modelled by NIEIR and takes into account differences in hours worked between industry sectors. It is a measure that allows direct comparison of employment between industries in Yorke Peninsula Council area.

Typically, industries such as Retail Trade and Accommodation and Food Services, which employ many part-time workers, have lower FTE employment than total employment.

FTE employment is calculated directly by dividing the total hours worked in each industry by 38. By comparing the number of full-time equivalent jobs in each industry sector to a regional benchmark, you can clearly see the structure of RDA Yorke and Mid North Region's economy. This can be done by directly comparing the area to its benchmark, or by using a location quotient to look at the relative size of industries.

FTE employment should be viewed in conjunction with [Employment by industry \(Total\)](#) and [Employment by industry \(Census\)](#), for a full understanding of the industry breakdown in the area. [Worker productivity](#) data shows the value of a worker in each industry to the local economy. [Employment locations](#) shows where employment is taking place in each industry sector.

NOTE: FTE employment is derived from Census data but has been corrected for the known undercount of employment in the Census. Detailed notes about how the figures are derived can be found in the [specific topic notes](#) section.

## Full-time equivalent employment by industry sector

## Dominant groups

An analysis of the jobs held by the full-time equivalent local workers in Yorke Peninsula Council area in 2017/18 shows the three largest industries were:

- Agriculture, Forestry and Fishing (1,186 full-time equivalent local workers or 34.3%)
- Health Care and Social Assistance (314 full-time equivalent local workers or 9.1%)
- Retail Trade (287 full-time equivalent local workers or 8.3%)

In combination these three industries accounted for 1,788 people in total or 51.8% of local workers.

In comparison, Regional SA employed 21.3% in Agriculture, Forestry and Fishing; 9.8% in Health Care and Social Assistance; and 8.7% in Retail Trade.

The major differences between the jobs held by the full-time equivalent local workers of Yorke Peninsula Council area and Regional SA were:

- A *larger* percentage of full-time equivalent local workers employed in Agriculture, Forestry and Fishing (34.3% compared to 21.3%)
- A *smaller* percentage of full-time equivalent local workers employed in Manufacturing (5.8% compared to 11.5%)
- A *smaller* percentage of full-time equivalent local workers employed in Construction (4.9% compared to 8.0%)
- A *smaller* percentage of full-time equivalent local workers employed in Mining (1.9% compared to 4.6%)

## Emerging groups

The number of local workers in the full-time equivalent work in Yorke Peninsula Council area decreased by 313 between 2012/13 and 2017/18.

The largest changes in the jobs held by the full-time equivalent local workers between 2012/13 and 2017/18 in Yorke Peninsula Council area were for those employed in:

- Agriculture, Forestry and Fishing (-163 full-time equivalent local workers)
- Mining (-85 full-time equivalent local workers)
- Accommodation and Food Services (-61 full-time equivalent local workers)

# Yorke Peninsula Council area

## Value added

Value added by industry is an indicator of business productivity in RDA Yorke and Mid North Region. It shows how productive each industry sector is at increasing the value of its inputs. It is a more refined measure of the productivity of an industry sector than output (total gross revenue), as some industries have high levels of output but require large amounts of input expenditure to achieve that.

By comparing the value added of each industry sector to a regional benchmark, you can clearly see the structure of RDA Yorke and Mid North Region's economy. This can be done by directly comparing the percentage contribution of each industry to the total output, relative to the benchmark, or by using a location quotient, where a number greater than one indicates a high concentration of that industry and less than one indicates a lower concentration.

To see what contribution each industry makes to the state or region, see the [Industry sector analysis](#) section. To understand the value of a worker in each industry, view this dataset in conjunction with [Worker productivity](#) data, and to see the relationship of value added to the total size of the economy, go to the [Gross Regional Product](#) section.

Detailed notes about how the figures are derived can be found in the [specific topic notes](#) section.

## Value added by industry sector

## Dominant groups

An analysis of the valued added by industry sectors in Yorke Peninsula Council area in 2017/18 shows the three largest industries were:

- Agriculture, Forestry and Fishing (\$174 million or 40.4%)
- Health Care and Social Assistance (\$33 million or 7.6%)
- Construction (\$33 million or 7.6%)

In combination these three industries accounted for \$239 million in total or 55.7% of the total value added by industry in Yorke Peninsula Council area.

In comparison, the same 3 industries in Regional SA accounted for 22.5% in Agriculture, Forestry and Fishing; 8.0% in Health Care and Social Assistance; and 8.4% in Construction.

**The major differences between the value added by industries of Yorke Peninsula Council area and Regional SA were:**

- A *larger* percentage of value added by Agriculture, Forestry and Fishing (40.4% compared to 22.5%)
- A *smaller* percentage of value added by Mining (1.9% compared to 10.9%)
- A *smaller* percentage of value added by Manufacturing (5.5% compared to 8.6%)
- A *smaller* percentage of value added by Transport, Postal and Warehousing (2.6% compared to 3.9%)

## Emerging groups

The total value added by industry in Yorke Peninsula Council area decreased by 27.0 million between 2012/13 and 2017/18.

*There were no major changes in the value added by industries between 2012/13 and 2017/18 in Yorke Peninsula Council area.*

# Yorke Peninsula Council area

## Worker productivity

Worker productivity by industry is calculated by dividing the industry value add by the number of persons employed in that industry. It shows which industries generate the most value add per employee. Some industry sectors, such as retail trade, are not highly productive per worker, but they employ a lot of people. Other industries, such as mining, employ fewer people but generate high levels of productivity. Each plays an important role in the economy.

Worker productivity data should be viewed in conjunction with [Employment by industry \(Total\)](#) and [Employment by industry \(FTE\)](#), to see the relative size of employment in each industry, and with [Local workers income](#) to see how many local workers are actually each in each industry, and with [Sources of income](#) data to see whether employment is the main way income is derived.

Detailed notes about how the figures are derived can be found in the [specific topic notes](#) section.

## Productivity per worker (annual) by industry

Yorke Peninsula Council area - Constant prices		2017/18		2012/13		Change

## Dominant groups

An analysis of the worker productivity by industry sectors in Yorke Peninsula Council area in 2017/18 shows the three highest industries were:

- Financial and Insurance Services (\$296,033)
- Electricity, Gas, Water and Waste Services (\$244,653)
- Wholesale Trade (\$196,962)

In comparison, the same 3 industries in Regional SA were for \$265,337 in Financial and Insurance Services; \$315,421 in Electricity, Gas, Water and Waste Services; and \$200,788 in Wholesale Trade.

The major differences between worker productivity by industries in Yorke Peninsula Council area and Regional SA were:

- *Higher* worker productivity in Construction (\$165,203 compared to \$115,544)
- *Lower* worker productivity in Mining (\$144,508 compared to \$284,107)
- *Lower* worker productivity in Electricity, Gas, Water and Waste Services (\$244,653 compared to \$315,421)
- *Lower* worker productivity in Rental, Hiring and Real Estate Services (\$125,519 compared to \$189,943)

## Emerging groups

The total worker productivity by industry in Yorke Peninsula Council area decreased by \$6,011 between 2012/13 and 2017/18.

The largest changes in worker productivity by industries between 2012/13 and 2017/18 in Yorke Peninsula Council area were for:

- Information Media and Telecommunications (+\$112,255)
- Rental, Hiring and Real Estate Services (-\$54,129)
- Transport, Postal and Warehousing (-\$45,577)
- Wholesale Trade (+\$39,830)

# Yorke Peninsula Council area

## Businesses by industry

Registered business by industry shows how many businesses there are in Yorke Peninsula Council area within each industry sector using the Australian Bureau of Statistics (ABS) Business Register which itself is derived from the GST register held by the Australian Tax Office (ATO). Businesses are included if they are registered with the ATO, with an ABN used within the previous two financial years. Businesses are split up between employing and non-employing businesses. Non-employing businesses may include sole traders and registered ABNs which are part of larger enterprises.

The distribution of businesses may reflect the industry structure of the area, or may differ significantly. For instance, the largest industry in an area may consist of one very large business, with a large number of employees, while a sector with a lower value added could have a lot of small and micro businesses.

The number of businesses in Yorke Peninsula Council area should be viewed in conjunction with [Employment by industry \(Total\)](#) and [Value added](#) datasets to see the relative size of industries, and with [Employment locations](#) data to see where business employment occurs within the area.

Please note that this data set has several limitations which are explained in the [data notes](#) for this topic. Business register counts are an approximation to LGA boundaries based on SA2 level data provided by the Australian Bureau of Statistics. As such, they may not exactly match figures sourced directly from the ATO, due to boundary issues and the application of ABS randomisation to the dataset. Notably, public sector institutions are not recorded which has a significant impact on the numbers for Health Care, Education and Public Administration and Safety.

## Registered businesses by industry

## Industry sector analysis - All industries

Industry sector profiles reveal the way in which each industry contributes to the economy in Yorke Peninsula Council area using ten economic measures generated by NIEIR economic modelling. This helps in understanding the role each industry sector plays in the economy.

For example, some industry sectors generate substantial output (turnover), but are not big employers and targeting those industry sectors may not meet the economic development objective of maximising employment.

In the first chart, you can also see how the output of an industry is divided between local sales, domestic exports and international exports. This information can reveal how an industry is structured, and whether it is focused on exporting or on serving the local population.

The table and second chart also show how Yorke Peninsula Council area contributes to the wider economy. For example, Yorke Peninsula Council area contributes 2.5% of Regional SA's employment.

Industry sector analysis data should be viewed in conjunction with [Employment by industry \(Total\)](#), [Employment by industry \(FTE\)](#), [Value added](#), [Imports](#) and [Exports](#) to see how each specific industry fits into the wider picture of all industries within Yorke Peninsula Council area. To see how concentrated each industry sector is, visit the [Employment locations](#) section.

The third chart refers to how employment in Yorke Peninsula Council area has changed overtime and how it compares to expected changes based on benchmark and industry trends. This type of analysis is explored further within the [Shift-share analysis](#) economic tool."

## Time series industry sector analysis

The annual industry sector analysis reveals the growth and decline of an industry from 2000/01 to the present. These charts show the year-on-year change in the different measures of an industry size, based on the 87 industry subsectors and 19 main industry divisions in the ANZSIC classification. An industry may be growing in the local area, but at a rate no different to that of the state or region. For this reason, measures are also included that compare the growth or decline of the industry with the equivalent in the benchmark area, based on a standard index base year of 2000/01. Another chart also looks at the change in an industry as a percentage of the benchmark.

For instance, an industry may double in size from \$100m to \$200m in total output. But if the state's output went up by the same amount, the percentage of state would be unchanged. On the other hand, if the state's output is declining but local output is unchanged, the percentage of state would increase. In this way change over time can be benchmarked.

Different measures may also grow and change in different ways. For instance, during the GFC, some industries retained staff but they worked less hours, resulting in a loss of FTE jobs but no loss of total employment. And an industry may have increasing exports without having an increase in total output.

Industry sector time-series analysis should be viewed in conjunction with [Local workers](#) data from the 2011 and 2006 Census to see how the characteristics of the local workers are changing in a growing or declining industry.

## Time series - Employment (total)

# RDA Yorke and Mid North Region

## Employment locations - All industries

Place of Work data, mapped to Destination Zones, provide an excellent spatial representation of where each industry's economic activity is conducted within RDA Yorke and Mid North Region.

Some industries are clustered in business parks, or along major transport routes. Others are associated with institutions such as schools, universities and hospitals.

Employment locations data should be viewed in conjunction with Workers place of residence data to see how far people travel to get to employment in RDA Yorke and Mid North Region, and with Employment by industry (Total) and Businesses by industry data to see the total size of industries in the area.

Data presented here show the number of local workers per destination zone at the 2016 Census. This has been derived from the ABS imputed dataset using methodology from the Bureau of Transport statistics, and adjusts for Census undercount.

### All industries

# RDA Yorke and Mid North Region

## Workers place of residence by industry - All industries

Journey to Work (workers) data shows where RDA Yorke and Mid North Region's local workers come from and how far they are travelling to access employment in the area.

This shows the degree to which the local economy draws on the wider region to supply labour for its industries. It is also useful in planning and advocacy for roads and public transport provision.

The distance and direction travelled by workers in different industry sectors may be influenced by the nature of employment opportunities (higher paid, high value employment may draw people from a wider area); the skill level required (jobs requiring tertiary qualifications will draw more workers from areas with high qualification levels among the residents) the number of jobs available in the industry sector (sectors with more opportunities may have a wider catchment); transport options available and commuting times to RDA Yorke and Mid North Region.

Workers place of residence data should be viewed alongside [Self-sufficiency](#) and [Jobs to workers ratio](#) datasets for a summary of local employment opportunity by industry, as well as modelled [Employment by industry \(Total\)](#) numbers and [Employment locations](#) to understand the relative size of each industry sector and its distribution across the RDA Yorke and Mid North Region. To analyse the characteristics of local workers in each industry, go to the [Local workers](#) section.

Excludes residential locations with fewer than 10 people.

# RDA Yorke and Mid North Region

## Residents place of work by industry - All industries

Journey to Work (residents) data shows where RDA Yorke and Mid North Region's resident workers go to work and whether they need to travel significant distances to work. This impacts upon planning and advocacy for roads and public transport provision, as well as economic development strategies to develop local employment which fits the skills and qualifications of the resident workers.

The distance travelled by residents in different industry sectors may be influenced by; the nature of employment opportunities versus the skills and qualifications of local residents; transport options available and commuting times; relationship between wages and salaries (people will travel further for higher paid jobs), house prices in the local area; and the geographic size of the local area (in large areas, local jobs may not in fact be so local, while in more compact areas, resident workers may walk to work in a neighbouring LGA.).

Please note that where an industry has a very small number of employed residents, there may be no information displayed on the map or the detailed table due to insufficient residents travelling to any one area to display. The summary table will still include the information for the total residents working locally or travelling outside the area to work.

Residents place of work data should be viewed alongside [Self-containment](#) and [Jobs to workers ratio](#) datasets, as well as modelled [Employed residents](#) estimates, which are updated annually. The [Resident workers](#) section will provide the characteristics of resident workers.

Excludes employment locations with fewer than 10 people.

# Yorke Peninsula Council area

## Jobs to workers ratio

A goal of economic development is often to maximise the employment opportunities locally, leading to a more socially and environmentally sustainable community.

Employment capacity is a simple way of looking at whether Yorke Peninsula Council area could theoretically provide jobs for all its residents if they were to choose to work locally.

Employment capacity is simply the number of local jobs in an industry, divided by the number of local residents employed (anywhere) in that industry. A figure over 1.0 means there are more jobs available than residents employed in that industry. Under 1.0 means there are more residents employed than jobs available in that sector.

This is a theoretical exercise as, even if there are enough jobs provided locally, there will always be some people who choose to commute out of the area.

Employment capacity data should be viewed in conjunction with [Self-containment](#) and [Residents place of work](#) data, which provides detail about the actual proportion of residents working locally, and [Gross Regional Product](#) and [Worker productivity](#) data which shows the economic contribution of residents and workers.

## Local workers - Key statistics - All industries

The local workers are made up of all the people who are employed in the local area, regardless of where they live. Local workers statistics reveal how the characteristics of the local workers in RDA Yorke and Mid North Region vary between each industry sector and indicates specific industry sector local worker requirements and employment opportunities.

Access the detailed tables for further exploration of each characteristic.

**NOTE:** All tables in the local workers section are based on Census employment data which differ from the NIEIR employment estimates. See data notes for more details.

**Please note** – The 2016 Census used a new methodology to “impute” a work location to people who didn’t state their workplace address. As a result, 2016 and 2011 place of work data are not normally comparable. To allow comparison between 2011 and 2016, .id has sourced a 2011 dataset from the ABS which was experimentally imputed using the same methodology. To provide this detail, Yorke Peninsula Council area in 2011 had to be constructed from a best fit of Work Destination Zones (DZNs). While it may not be an exact match to the LGA or region boundary, it is considered close enough to allow some comparison. Users should treat this time series data with caution, however, and not compare directly with 2011 data from any other source.

## Local workers - Age structure - All industries

The Age Structure of an industry's local workers is a key component to understanding the role and function of that industry in RDA Yorke and Mid North Region. It is an indicator of the age of the industry and how long it has been established in the area, as well as the possible challenges in expanding that industry in the future.

For example an area with young local workers may be more mobile and likely to change jobs/industries in the future while an industry with an older local workers may face succession planning issues and challenges in attracting new staff.

For a complete local workers analysis for RDA Yorke and Mid North Region, Age Structure should be viewed in conjunction with [Income](#) and [Hours worked](#).

**Please note** – The 2016 Census used a new methodology to “impute” a work location to people who didn't state their workplace address. As a result, 2016 and 2011 place of work data are not normally comparable. To allow comparison between 2011 and 2016, .id has sourced a 2011 dataset from the ABS which was experimentally imputed using the same methodology. To provide this detail, Yorke Peninsula Council area in 2011 had to be constructed from a best fit of Work Destination Zones (DZNs). While it may not be an exact match to the LGA or region boundary, it is considered close enough to allow some comparison. Users should treat this time series data with caution, however, and not compare directly with 2011 data from any other source.

## Dominant groups

Analysis of the age structure of the workforce in Yorke Peninsula Council area in 2016 compared to South Australia shows that there was a lower proportion of people in the younger age groups (15 to 44 years) and a higher proportion of people in the older age groups (45 years and over).

Overall, 41.2% of the workforce was aged under 45 years, compared to 56.0% for South Australia. 58.8% were aged 45 years and over, compared to 44.0% for South Australia.

The major differences between the age structure of the workforce in Yorke Peninsula Council area and South Australia were:

- A *larger* percentage of local workers aged 55 to 64 years (24.9% compared to 16.8%)
- A *larger* percentage of local workers aged 65 years and over (10.3% compared to 4.6%)
- A *smaller* percentage of local workers aged 25 to 34 years (14.4% compared to 21.0%)
- A *smaller* percentage of local workers aged 35 to 44 years (16.8% compared to 20.9%)

## Emerging groups

The largest changes in the age structure of the workforce in Yorke Peninsula Council area between 2011 and 2016 were:

- 45 to 54 years (-209 local workers)
- 55 to 64 years (+108 local workers)
- 35 to 44 years (-98 local workers)
- 65 years and over (+86 local workers)

# Yorke Peninsula Council area

## Local workers - Individual income quartiles - All industries

Individual Income is an indicator of socio-economic status, skills and occupations required in a particular industry. With other data sources, such as Qualifications and Occupation, it helps to evaluate the economic opportunities of people in an industry.

Income quartiles are used to condense income categories into manageable units, adjust for the effects of inflation, and allow areas to be compared over time relative to a benchmark. The incomes for a specified industry for the state are split into four equal groups, each containing 25% of the workers in that industry, and the quartiles allow users to compare changes in that industry in the local area to changes statewide, or against another benchmark. For more information on how quartiles are calculated please refer to the data notes.

As well as being related to the type of jobs and qualifications required in a particular industry, income levels can be related to the level of [part-time employment](#), [Occupations](#), [Qualifications](#) and the [Age structure](#) of the local workers, so the data should be looked at in conjunction with these topics.

**Please note** – The 2016 Census used a new methodology to “impute” a work location to people who didn’t state their workplace address. As a result, 2016 and 2011 place of work data are not normally comparable. To allow comparison between 2011 and 2016, .id has sourced a 2011 dataset from the ABS which was experimentally imputed using the same methodology. To provide this detail, Yorke Peninsula Council area in 2011 had to be constructed from a best fit of Work Destination Zones (DZNs). While it may not be an exact match to the LGA or region boundary, it is considered close enough to allow some comparison. Users should treat this time series data with caution, however, and not compare directly with 2011 data from any other source.

## Dominant groups

Income quartiles allow us to compare relative income-earning capabilities across time. Analysis of the distribution of the by income quartile compared to South Australia shows that there was lesser proportion of people in the highest income quartile, and a greater proportion in the lowest income quartile.

## Emerging groups

The most significant change for the between 2011 and 2016 was in the medium lowest quartile which showed a slight decrease of -83 people.

# Yorke Peninsula Council area

## Resident workers - Key statistics

The local resident workers include all employed people who are resident in the local area regardless of where they work. In other words, it is the people who live locally and therefore have the potential to work locally and is an important resource for the local economy. Their characteristics inform us about the skills that are available locally, even if they are not currently employed in the local economy.

[Access the detailed tables for further exploration of each characteristic.](#)

RDA Yorke and Mid North Region Economic Profile provides economic analysis for the Yorke Peninsula Council area by combining 11 different datasets to build a cohesive story of a local economy, how it is changing and how it compares to other areas.

It is a public resource designed to be used by council staff, community groups, investors, business people, students and the general public. You can be confident about the quality of the information as it is derived from official sources and the most robust economic modelling, analysed and presented by experts and funded by RDA Yorke and Mid North Region. Each data source is maintained with the latest series so you can be sure you are using the most up to date information.

Results for the RDA Yorke and Mid North Region include Gross Regional Product, local jobs, local businesses, employment, unemployment, population, building approvals, industry structure, journey to work and much more.

## About National Economics (NIEIR)

Reliable primary economic data sets exist only at the national, state and regional level at best. The only way to get a realistic measure of GRP, number of jobs and other economic indicators at the local area level is to undertake economic modelling. The most significant challenge with local area economic modelling is to ensure that the process reflects the unique economic characteristics of the local area. For example, one of the traps is to apply national and state-level productivity propensities at the local level, which we now know are simply not accurate because it assumes that the economic characteristics of all local areas are the same.

NIEIR are recognised as industry leaders in the development and provision of robust economic modelling at the smallest credible geographic unit (Local Government Area). NIEIR modelling draws on many data sources to offer the most nuanced data possible at the local level. The NIEIR dataset is the result of a process of economic micro-simulation modelling – it is an amalgam of many different existing data sources (between 6 and 10 depending on the region and time period) which are synthesised to produce a series of estimates of the size and value of the local economy.

Importantly, the NIEIR model is updated on an annual basis (with quarterly breakdown for some characteristics). This means the impact of global, national and local economic changes can be clearly seen at the local level.

For over 15 years NIEIR have been producing the annual benchmark State of the Regions Report commissioned by the Australian Local Government Association (ALGA). These reports benchmark regional economies and identifies strategies that strengthen local and regional economic and employment outcomes, laying the framework for future policy direction and emphasizing the role and importance of local government.

## About .id, the population experts

.id is a company of population experts - demographers, spatial analysts, urban planners, forecasters, census data and IT experts who build demographic information products for Australia & New Zealand.

We understand how cities, towns and regions are growing and changing. Name a place and we can tell you about its population's past, present and future!

We use spatial data to tell this story in powerful web applications.

We share this knowledge with our clients so they can make confident decisions about when and where to provide services and invest in infrastructure.

Our clients are organisations who contribute to building our cities and communities. They include local & state government, education providers, housing developers, retailers, health care providers, utilities companies, banks & insurers, sporting clubs and planning consultants.

During our 15 years in business, we have built over 550 websites delivering analytical and spatial decision making information to more than 300 clients Australia-wide and in New Zealand. These sites are publicly available in [.id's demographic resource centre](#).

Our information products meet the challenge of delivering meaningful information to users with diverse information needs and skill levels – from analysts to the general public – by organising and presenting complex data in an intuitive format. As consumers of spatial data ourselves, we fundamentally understand how users want to consume that data.

We believe that by making demographic information accessible to the broadest possible audience, and promoting evidence-based decision making, we are contributing to a fairer and more sustainable society.

# Yorke Peninsula Council area

## Agriculture

Agricultural production is a very important contributor to Australia's economy, and is a key industry in many rural and regional areas, as well as some outer metropolitan areas.

The data presented here are sourced from the 2015-16 Agricultural Census, run by the Australian Bureau of Statistics. The data show the gross value of agricultural commodities in broad categories, measured across two Agricultural Census periods.

Agriculture value data should be viewed in conjunction with the [Industry Sector Analysis](#) page for the Agriculture sector, which has modelled estimates of the size of the industry on an annual basis. The [Employment Locations](#) page will show where agricultural activity is taking place and the [Workforce Profiles](#) section will reveal the characteristics of agricultural workers.

## Value of agricultural production

## Tourism and hospitality value

Tourism and hospitality are key industries and major contributors to Australia's economy. However it has not been well represented in economic profiles in the past, because it actually includes parts of many different traditional industries. The Australian Bureau of Statistics publish the "Tourism Satellite Account" which is a separate set of national accounts which look at the value and contribution of tourism in the national economy.

This dataset presents National Economics microsimulation model of the tourism satellite account at the local level, showing the value of total sales and value add, as well as annual estimates of employment and FTE employment for the tourism sector.

Understanding the current role of your tourism sector is important if you are looking at attracting visitors to your area, and as information for businesses looking to locate in the area. Tourism data should be viewed in conjunction with broader industry data in the [Value added](#), [Output](#) and [Employment by industry \(Total\)](#) topics, as well as tourism [Workforce characteristics](#).

## Tourism and hospitality workforce

Tourism and hospitality are key industries in many parts of Australia, but it has not been well represented in economic profiles in the past due to the difficulty in defining it.

The tourism and hospitality industries are defined by the ABS not as regular industries but as a set of occupation categories working across a number of industries.

This page presents some key statistics for tourism and hospitality workers in Yorke Peninsula Council area with comparisons to benchmark areas. Tourism and hospitality data should be viewed in conjunction with the [Industry sector analysis](#) page for the accommodation sector, which has modelled estimates of the size of the industry on an annual basis. The [Employment locations](#) page will show where accommodation activity is taking place and the [Local workers](#) section will reveal the characteristics of accommodation workers.

**Please note:** Due to a change in the occupation classification, Tourism and Hospitality occupation data are currently only available from the 2016 Census.
